SEWAGE SLUDGE UTILIZATION LICENSE INSPECTIONS

After submission of an Application for Sewage Sludge Utilization Permit and applicable fee, the applicant must contact the DPS Well and Septic inspector to schedule a truck inspection, if applicable. Inspections are not required for application submittals containing a valid 'reciprocal' inspection report.

Inspection requests may be scheduled by contacting the inspector directly, or by calling the Well and Septic inspection line at (240) 777-6306. ([Link to Find My Inspector](#))

Inspection requirements:

- On the day of the vehicle inspection be sure to have the tank filled to at least 1/3 the tank capacity with clean water.
- The company name and address must be permanently lettered on both sides of the vehicle.
- The Montgomery County permit number must be printed on both sides of the vehicle, in the proper format for the renewal year (ex: **MC-18-XXX**). Vehicles lacking this information will not be approved and will have to return for re-inspection once they have been properly labeled.

Scavenger truck owners and operators should be aware that they will be subject to legal penalties and fines if they are found operating trucks in Montgomery County without the required permits
