Restoring Neighborhood Infrastructure

Progress Report through June 2012

RENEW MONTGOMERY

Restoring Neighborhood Infrastructure

Renew Montgomery is a comprehensive program which coordinates Department of Transportation services to improve the infrastructure of mature neighborhoods. The program helps to assure safe and attractive access to business districts, public facilities, and recreational opportunities. It also serves to enhance neighborhoods, ensuring a high quality of life in the County.

"The Renew Montgomery program has had several positive impacts on my neighborhood. First, badly needed infrastructure improvements were made. Second, the neighborhood is safer and looks cleaner. Third, the improvements have left a positive image of County government on many of the neighbors. They can see that a significant amount of attention was paid to the area."

Philip Olivetti, President
Linden Civic Association
Silver Spring, Maryland

"On behalf of the Connecticut Avenue Estates Civic Association, I want to thank your department for the great work that was done upgrading specified sidewalks, gutters and curbs with ADA enhancements, and repaving CAE's streets. It was interesting watching the workers in action and the displaying of teamwork with the various 'Mighty Machines' from surveying up to the final laying out of . . . the hot mix asphalt. There was good coordination between the D.O.T. and others in the area . . . CAE neighbors took advantage of getting a lead and apron for their driveways which helped some of the parking problems that we have here. This Renew Montgomery program adds to he beautification for the County and should increase the property value of our 600-plus homes. Thank you."

Carolyn Gupta, President
Connecticut Avenue Estates Civic Association
Silver Spring, Maryland

RENEW MONTGOMERY PROGRESS REPORT

INTRODUCTION

The Montgomery County Department of Transportation periodically publishes a progress report on the Renew Montgomery program. This report contains background information on the program, listing of participating neighborhoods, financial summaries, and maps of designated and still active Renew Montgomery neighborhoods since fiscal year 2003. In addition the report contains construction updates available when reprinting occurred.

Renew Montgomery continues to be successful in addressing the infrastructure needs of the County. Since its beginning in 1997, Renew Montgomery has improved or is programmed to improve infrastructure conditions in 71 areas of the county (through FY11) at an investment of $65 million (expenditures through the close of FY11).

SERVICES PROVIDED

Renew Montgomery continues to coordinate Montgomery County Department of Transportation (MCDOT) services where appropriate and as determined by departmental guidelines. These services may include:

AMERICAN WITH DISABILITIES ACT (ADA) IMPROVEMENTS

Provision of accessible streets, roads, and walkways for people with disabilities by installing curb ramps; removing barriers on existing sidewalks, such as signs, poles, and fences, which hamper accessibility to wheelchair users; and reconstructing median breaks and sidewalks to comply with the ADA. For information on these types of improvements in your neighborhood, installed by the Division of Transportation Engineering, call 311.

BUS STOP AMENITIES

Installation of Ride On bus stop signs, shelters, benches and bus stop access improvements such as connecting sidewalks and waiting pads where applicable. For information on these types of improvements in your neighborhood, installed by the Division of Transit Services, call 311.

NEIGHBORHOOD BEAUTIFICATION

Designation of beautification grants to assist neighborhoods with beautification projects. Through the Keep Montgomery County Beautiful program, neighborhoods are eligible for a grant of up to $500 to match the community's share of a beautification project. Note, these grants are temporarily suspended due to fiscal constraints. Types of projects can include planting flowers, shrubs, or trees; landscaping a community entranceway; converting weed fields to grassy areas; and planting rain gardens. For information on these grants for your neighborhood, contact MCDOT Community Outreach, at 240.777.7155.

ROADWAY BASE REPAIRS

Removal and replacement of defective road base which allows water penetration and the resulting road failures. This work is completed prior to sealing/resurfacing roads. For information on work underway in your neighborhood, handled by the Division of Highway Services, call 311.

ROAD RESURFACING

Application of a durable surface which offers improved traction and coloration to road surfaces. For information on work underway in your neighborhood, handled by the Division of Highway Services, call 311.

SIDEWALK, CURB AND GUTTER REPAIR

Removal and replacement, in kind, those public sidewalks, curbs and gutters which are cracked, raised, exhibit periodic ponding or have missing segments. For information on work underway in your neighborhood, handled by the Division of Highway Services, call 311.

SIDEWALKS - NEW

Construction of sidewalks to encourage greater pedestrian circulation throughout neighborhoods and to provide safe access to schools, transit facilities, parks, and other major pedestrian destinations. Requests for construction are prompted by members of the community seeking improved pedestrian access. For information on these types of improvements in your neighborhood, installed by the Division of Transportation Engineering, call 311.

SIGN AND MARKING MAINTENANCE

Removal, repair or replacement of damaged, vandalized or faded traffic signs and pavement markings. For information on these types of improvements in your neighborhood, installed by the Division of Traffic Engineering & Operations, call 311.

STORM DRAIN IMPROVEMENTS

Analysis and design to upgrade substandard existing systems in conjunction with sidewalk, curb and gutter replacement and resurfacing. Provision of new drainage structures where possible to improve chronic problems. Identification of major system improvements for future Capital Projects when warranted. For information on these types of improvements in your neighborhood, installed by the Division of Transportation Engineering, call 311.

STREET LIGHTING

At the request of a two-thirds majority of effected residents, areas that have substandard lighting are identified. Street lighting improvements (i.e. upgrade of existing or installation of new streetlights) are designed then implemented to achieve lighting levels that meet County standards. For information on these types of improvements in your neighborhood, installed by the Division of Traffic Engineering & Operations, call 311.

TRAFFIC CALMING

Identification of residential streets which would benefit from installation of various modifications to the roadway as warranted by engineering standards and supported by the community. These measures reduce the negative effects of motor vehicle use such as speeding and neighborhood cut-through traffic, alter driver behavior, and improve conditions for pedestrians. For information on proposing these measures for your neighborhood, installed by the Division of Traffic Engineering & Operations, call 311.

TREE MAINTENANCE

Resolution of priority and requested tree maintenance needs. Work may include tree and stump removal of appropriate trees, pruning to resolve pending priority citizen requests, and replacement tree planting. For information on work underway in your neighborhood, handled by the Division of Highway Services, call 311.

The following tables list all of the neighborhoods currently in the program and provide an indication of their status. Table 1 groups the neighborhoods by fiscal year. Table 2 lists the neighborhoods in alphabetical order to aid in locating a specific community.

A special commendation should go to Dan Edwards, because without him, I fear the project would have never been completed! Dan did an OUTSTANDING job dealing with the many obstacles he encountered on the street. Needless to say, we are all so pleased with the beautification of our street. It looks wonderful! Sincerely, Maria Warner” (9/10/07) * This project was very controversial last year. The residents were polarized over the loss of 25-mature trees. It was determined several years ago that the trees must be removed in order to install new curb and gutters. This issue of tree removal reached the State Arborist as wel as the County Executive and also involved a Delegate. Some residents wanted to save the trees, some wanted the new curbs. The Division of Highway Services was able to give them both! (KC 9/12/07)

Carroll Knolls/Plyers Mill Ests./Oakland Terrace [includes Kensington Heights civic association]	FY 2007	Traffic Engineering	Complete	* Traffic Engineering reported replacing four street signs and poles (JP, 10/1/07) * DTEO may do new crosswalk markings once resurfacing is complete. (JP, 2/6/12)

Carroll Knolls/Plyers Mill Ests./Oakland Terrace [includes Kensington Heights civic association]	FY 2007	Traffic Engineering	Started	* The faded signs at the intersection of Findley Road and Devin Place have been replaced. The foliage obstructing stop signs at the intersections of McComas Avenue and Pearson Street and St Paul Street and McComas Avenue has been trimmed back. An extended "No Parking Any Time" prohibition has been installed on Drumm Avenue at the intersection with University Boulevard. (JP, 5/12/09) * The Division of Traffic Engineering & Operations (DTEO) conducted studies at the intersections of McComas Avenue and Bently Street and Drumm Avenue and Decatur Avenue based on requests for additional stop signs by residents. However it was determined that all-way stops were not warranted at these intersections. The stop sign on Bentley Street at McComas Avenue was replaced. * The request for a marked crosswalk to Kensington Heights Park at the intersection of McComas Avenue and Farragut Avenue cannot be considered as there is no sidewalk on the south side of McComas Avenue or on Farragut Avenue. If sidewalks were built at these locations, our department could re-examine this issue. (JP, 5/12/09) * All of the street light outages are on record as having been reported to DTEO; however, since most of them are maintained by PEPCO they do not receive reports of the work being completed. (JP, 5/12/09) * Regarding traffic calming requests, the results of the spot speed studies that we conducted for McComas Ave, Drumm Ave and Hobson Street indicated these streets did not meet DTEO's speed and volume criteria for speed humps. ·The prohibitively steep grades along the entirety of Drumm Ave and Hobson Street also were at issue, as well as the insufficient length of Faulkner Place (must be at least 1,000' long). Along a portion of McComas Ave, the grade is too steep to be suitable for placing speed humps. However, it appears that there are other locations that have acceptable grades and are located 500'-750' from other suitable locations, so that development of a viable speed hump layout would be is possible for at least part of the street (if the speed and volume criteria were met). DTEO staff are going to re-check this street for speed and volumes. (TW, 5/13/09)

South Four Corners	FY 2006	Concrete Construction	Complete	* We will be installing concrete curb and gutter on virtually every road within our boundaries in South Four Corners. We want to stick to our boundaries for Renew Montgomery work because our Residential Concrete Repair Program passed through the rest of the area (from Renfrew to Tenbrook) back in 1998 – 1999. (JB, 7/13/06)* All concrete work done for this season. (AD, 10/1/07)* Concrete work is 75% completed. (7/7/08, JB)* All concrete work is completed (AD, 7/17/2009) * Additional investment (AD 7/17/09)
South Four Corners	FY 2006	Drainage Improvements	Started	* We are currently studying Hereford Place and Perth Place for inclusion in the curbing process and I am 90% certain that they will be included. The roads are wide enough and we really don't have any obstructions except for Hereford Pl. just above Perth where a large tree is located. That section will not receive curbing because we cannot take down trees during this process. We have plenty of drainage structures to carry the water to, so drainage is not a problem. (JB, 5/3/06)
South Four Corners	FY 2006	Resurfacing	Not Started	* Ready for final surface repairs, preparation, and resurfacing of roads to complete Renew Montgomery work.

SAMPLE LETTER

FROM CIVIC ASSOCIATION OFFICIAL IDENTIFYING NEIGHBORHOOD ISSUES

TO: Tom Pogue, Community Outreach Manager
Montgomery County Department of Transportation
101 Monroe Street, 10th floor
Rockville, MD 20850-2540

or

tom.pogue@montgomerycountymd.gov

We would like to submit the following list of projects for consideration in the Renew Montgomery program.

*Linden Lane — Upgrade the sidewalk basically from the intersection of Brookville to the Linden Bridge. We have received more written and oral comments about the lack of real sidewalks on this road. The existing "sidewalk" is made of asphalt The curbing and drainage also infrastructure needs to be repaired.

Storm drains along this stretch - rain water pools in the street.

*Storm drain repair — Linden and Monroe

*Gutters/curbing — Monroe Street
One homeowner writes that their address is xxxx Seminary but our driveway access is on Monroe. When it rains, a lot of the water that rushes down Monroe on our side of the street ends up at the bottom of our driveway.

*New Street Light - Seminary Place adjacent to the Montgomery Hills Park.
This poorly lit area sits at the entrance to the park. Also serves as the crossing point across Seminary Road. This is a traffic and pedestrian safety issue.

*Crosswalks - Seminary Road at Brookville Rd and Park
Repaint existing crosswalk
Line at stop sign on Seminary Place

*Road — Second Ave/Landsdown
Asphalt Road repair

*Gutter/curbs — Riley Place, Riley Road
Replace.

*Bus stops — Seminary Road
Bus stop and or benches

Any questions, please contact me at xyz@email.com or 301-123-4567.

Sincerely,
XXXXXX
President, ABC Civic Association

CONCLUSION

The Department of Transportation continues to address a compelling need for infrastructure repair work through Renew Montgomery and ongoing efforts in other neighborhoods. As more funds are spent for Renew Montgomery, the rate of increase of infrastructure backlog is diminishing. The department is able to be more proactive with scheduled work rather than responding to emergency situations. Renew Montgomery plays an important role in improving the aesthetics and value of a neighborhood and enhancing the quality of life enjoyed by our residents.
