MECHANICAL INSPECTION REPORT/CERTIFICATION FOR LP-GAS SYSTEM

The Department of Permitting Services will accept this report/certification in lieu of inspecting the work noted below. This inspection must be conducted by a State of Maryland Licensed Master Plumber, Propane Gas Fitters Certification holder, or a professional engineer responsible for this project.

This special report is to include **piping materials and methods of installation, burial depth, joints and connections, storage tanks installation and other applicable requirements of the code.** The piping system being tested includes those of all stationary equipment, including but not limited to industrial, commercial and residential tanks.

Description of system tested: _____

Liquid Propane Piping and Storage

Maximum working pressure _____, test pressure, _____, time tested _____,
 cubic feet of pipe volume _____

Approved Disapproved Comments: _____

**PROVIDE AN ORIGINAL COPY FOR THE INSPECTOR AT JOB SITE
 SUPPLEMENTAL TESTING REPORTS AND INSPECTION RECORDS SHALL BE
 ATTACHED TO THIS REPORT.**

I certify this report is true and that the equipment has been inspected and tested in compliance with IRC, IMC, NFPA, or IFGC, as appropriate. This certification represents the completion of this phase of construction.

- MD Master Plumber license number _____
- MD Propane Gas Fitters Certification holder license number _____
- MDPE license number _____

Date inspected _____

Mechanical permit number _____
