Dear Engineer/Developer:

Re: Mandatory Runoff Statement<sup>1</sup> for Engineered Sediment Control Plans

Beginning November 1, 2020, all new applications for engineered sediment control permits must include the following Runoff Statement on the first plan sheet. This statement must be completed by the design engineer prior to DPS plan approval.

## RUNOFF STATEMENT

I understand that DPS approval of this sediment control/stormwater management plan is for demonstrated compliance with required environmental runoff treatment standards. This DPS sediment control/stormwater management plan approval does not relieve me of professional responsibility. I have analyzed the proposed design for sediment control permit no. \_\_\_\_\_ and hereby certify that, based upon my background, training and experience, I have determined that the proposed improvements shown on this plan meet relevant laws and regulations. I further acknowledge that I have analyzed the post development runoff patterns for this project from the standpoint of my responsibilities under current Maryland Law and have determined that if permission is required from adjacent property owners, I have obtained it and have made copies of those permissions available to DPS.
