Revised November 12, 2020

Dear Engineer/Developer:

Re: Mandatory Drainage Statement for Engineered Sediment Control Plans

Beginning November 1, 2020 all new applications for engineered sediment control permits must include the following Drainage Statement on the first plan sheet. This statement must be completed by the design engineer prior to DPS plan approval.

## DRAINAGE STATEMENT

I understand that DPS approval of this sediment control/stormwater management plan is for demonstrated compliance with required environmental runoff treatment standards. This DPS sediment control/stormwater management plan approval does not relieve me of professional responsibility. I have analyzed the proposed design for sediment control permit no. \_\_\_\_\_ and hereby state that, based upon my background, training and experience, I have determined that the proposed improvements shown on this plan meet relevant laws and regulations. I further acknowledge that I have analyzed the post development drainage patterns for this project from the standpoint of my responsibilities under current Maryland Law and have determined that if permission is required from adjacent property owners, it has been obtained and copies of those permissions have been made available to DPS.
