

Clearspring Manor

Stream Restoration

Community Stream Walk Sat, Sept. 16th 10:00 am – 12:00 pm

Meet in the cul-de-sac at the end of Durango Drive
In case of inclement weather, call 240-499-8531

Join Montgomery County's Department of Environmental Protection (MCDEP) to learn about a proposed stream restoration project in your community. The proposed project will stabilize and enhance the existing stream corridor shown to the right.

We will walk the entire stream reach and discuss the restoration actions and impacts associated with the project. Please come ready to hike in the wooded area and stream valley. Community members will be able to ask questions and provide their feedback.

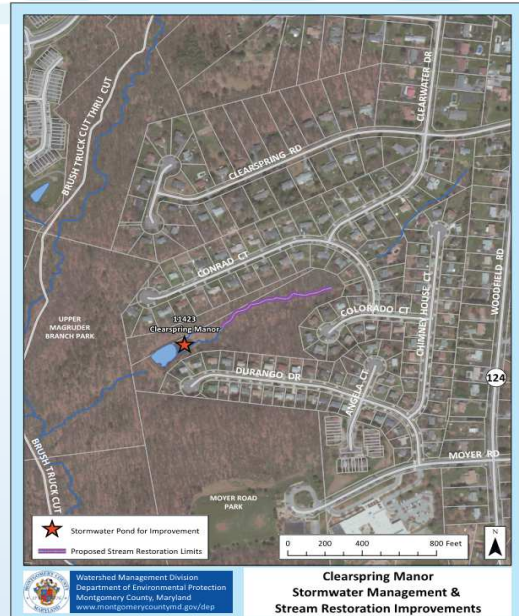

This project is part of the County's larger goal to reduce stormwater runoff, minimize pollution, promote infiltration, and restore stream conditions in the Great Seneca Creek, the Potomac River, and the Chesapeake Bay.

This project is being done in conjunction with the Clearspring Manor stormwater pond improvement project. A separate public meeting will be held on Wednesday, Sept. 13th.
