

Montgomery County, MD
RainScapes Rewards Rebate

RainScapes projects are voluntary projects designed to reduce stormwater runoff and enhance the local environment. RainScapes Rewards Rebate projects are funded by the Water Quality Protection Charge (WQPC). Only new projects will be considered for a rebate. These projects cannot be used to fulfill a county required stormwater permit. Any projects above and beyond a stormwater permit are acceptable. In order to qualify for consideration for a rebate properties must be located within Montgomery County but outside of the municipalities of Rockville, Gaithersburg, and Takoma Park. These jurisdictions collect their WQPC separately.

Project Timeline and Requirements	
1.	Plan for the project by reading the requirements, website and design manual for the specific Rainscapes practice. Please also read our “How to apply for a Rebate” document.
2.	Obtain your 8 digit county tax ID number for the application
3.	Submit your RainScapes rebate application. If you don’t get an email from RainScapes@montgomerycountymd.gov then you did not finish your application. If you need help please contact us through that email.
4.	If your application contains all the necessary information you will be contacted by the Department of Environmental Protection to schedule a mandatory preliminary inspection*. These inspections are required before project installation can begin. <i>*No preliminary inspection is needed for rain barrels or tree canopy projects</i>
5.	Supporting documents specific to each rebate type will need to be submitted. This can happen before or after the preliminary inspection. Please see the project requirements for a supporting documents list.
6.	Once you’ve passed the preliminary inspection and all the supporting documents have been reviewed, and approved, an application response letter* detailing approval and rebate funding level will be sent. A property owner agreement will also be sent at this time. <i>*Once you receive the approval notice installation of the project can begin.</i>
7.	Projects must be installed within six months of the date of the approval letter. Please don’t hesitate to contact us with questions you may have.
8.	Contact the Department of Environmental Protection once the project is installed to schedule a final inspection.
9.	At the final inspection you may receive a list of necessary changes to be made before a rebate can be issued. Completion of any adjustments will need to be photo documented and emailed to rainscapes@montgomerycountymd.gov . Depending on the number of adjustments a second final inspection may be necessary.
10.	Submit at the end: <ul style="list-style-type: none"> • Copies of the receipts itemized and the sales tax subtracted • The original signed property owner agreement
11.	Once you’ve passed the final inspection, submitted receipts, and submitted your original signed property owner agreement your rebate request will be processed. The rebate check will be issued by the department of finance.

All decisions regarding eligibility of applications and processing of applications are final and are at the sole discretion of the Department of Environmental Protection

RainScapes Rewards Rebate
Design Criteria and Requirements for Project Eligibility
Water Harvesting: Rain Barrels
Updated: January 2014

Required Supporting documents:

- HOA approval letter if applicable

▪ **Residential**

- No pre-approval is necessary, but accepted project must meet our requirements
- Rebate amount:
 - \$1.00 per gallon
- Maximum rebate:
 - \$250.00
- Minimum size for entire project:
 - 200 gallons (100 gallons for townhomes)
- Minimum barrel size:
 - 50 gallons
- Location:
 - On private property
 - Above ground
 - Installed on a solid, level support base
 - Overflow drains onto a pervious surface (grass, garden, etc.) or back into the downspout
 - Overflow drainage outlet directed a minimum of 4' away from foundation
 - Positive overflow drainage away from foundation
 - Overflow does not change the pre-existing flow path of stormwater
- Barrel Design:
 - Secure lid and/or screen
 - Water spigot at the bottom of the barrel for releasing water
 - Made of hard plastic or wood, no bags
 - Overflow with pipe that releases water on to the ground
 - Clear access for cleaning the inlets when necessary
- Final Steps
 - Submit itemized receipts with the tax subtracted
 - Submit the signed property owner agreement with original signatures (no copies)
 - Schedule and pass final inspection
