Routes to Change Schedules Sunday, September 17, 2017

These services will be eliminated because of poor performance:

3, 93, 94

Each year, Ride On creates a performance indicator for each route and ranks them accordingly. The performance indicator compares the resources allocated to each route with the number of average daily riders. The routes that are being eliminated were the lowest performing in Ride On's system. *For available alternatives, see RideonBus.com*
