To have new sidewalks installed, you must file a petition with DOT's Engineering's Sidewalk Program. The main number is 311 and staff will explain the process regarding the installation of new sidewalks. Highway Services will only connect missing links between stretches of previously existing sidewalk. To have curbing installed where none exists you must submit your request via form either online or hard copy on behalf of your street, or on a larger scale, your subdivision or association. DOT will then conduct an investigation, including feasibility studies and cost analysis. Consideration must be given to funding at the time, as they have to maintain infrastructure that is already in place before they install new. You may need to submit a petition signed by yourself and your neighbors before they proceed with these studies. The County also may require that homeowners without driveway aprons install one at their expense, if they are to be a part of the curbing process. Requests are evaluated on a case-by-case basis. **Please note:** Most municipalities, such as the City of Rockville and the City of Gaithersburg, maintain their own roadways.
