The VA set up the Gulf War Registry health examination program to track the special health concerns of veterans who served in the Gulf during Operations Desert Shield, Desert Storm or Iraqi Freedom. Gulf War veterans have experienced a variety of illnesses and conditions since serving in the Gulf. VA health professionals are trained in diagnosing and treating these many conditions. You do not need to be enrolled in the VA health care system to be eligible to participate in the Gulf War Registry examination program. The Gulf War Registry examination is cost-free. Veterans who served in the Gulf during Operations Desert Shield, Desert Storm, or Iraqi Freedom do not have a copay. Veterans will receive a comprehensive examination, including exposure and medical histories, laboratory tests, and physical exam. Results will be discussed by a VA health professional with veteran, both in a personal face-to-face consultation and a follow-up letter. Veterans interested in participating in the registry should ask to speak to their Environmental Health Coordinator or Patient Care Advocate at the nearest VA medical facility for information about participating in the Gulf War Registry.
