#### DESCRIPTION

This project provides funding for the design and construction of modern life safety systems to protect fire/rescue stations and their occupants in the event of fire emergencies. Implementation of this project will help to minimize the dangers to life from fire, including smoke and fumes. The scope of the project encompasses fire alarms with voice capabilities, sprinkler activation for fire suppression, fire and smoke detection, and smoke control systems.

#### JUSTIFICATION

Numerous fire/rescue stations are in need of modern, basic life safety systems. In many older fire/rescue stations, there are no fire alarms or sprinklers. Fire/rescue stations are 24-hour residential facilities. In case of fire, there could be significant exposure to loss of life and property. Several fire and rescue stations do not meet codes and have outdated fire alarm systems for which spare parts are no longer available and which can no longer be kept in reliable operation. Many of these fire/rescue stations were built years ago, and thus, were grandfathered under the fire code since the occupancy category has not changed. The outdated systems need to be replaced and updated to provide improved protection.

#### OTHER

The following stations are included in this project:

Bethesda Station 6, Gaithersburg Station 8, Hyattstown Station 9, Glen Echo Station 11, Hillandale Station 12, Damascus Station 13, Silver Spring Station 16, Laytonsville Station 17, Kensington Station 18, Silver Spring Station 19, Bethesda Station 20, Kensington Station 21, Hillandale Station 24, Kensington Station 25, Bethesda Station 26, Cabin John Station 30, Rockville Station 31, Rockville Station 33, and Sandy Spring Station 40.

#### FISCAL NOTE

Debt service for this project will be financed with Consolidated Fire Tax District Funds.
