DESCRIPTION

This project provides for transportation improvements such as intersection modifications, sidewalks, traffic signals, streetlights, etc., necessary for safe pedestrian and vehicular circulation for schools identified in the Montgomery County Public Schools (MCPS) Capital Program. One aspect of this project will focus on improving pedestrian walkability by creating a safer walking environment, utilizing selected engineering technologies, and ensuring ADA compliance.

COST CHANGE

Increase due to the addition of FY13 and FY14 to this on-going project.

JUSTIFICATION

This project is the result of a task force which includes representatives from the County Executive, County Council, MCPS, M-NCPPC, and the Maryland State Highway Administration. The construction of schools in the County must be supported by off-site transportation improvements to provide safe access. An individual study has been undertaken to identify requirements related to each new school.

OTHER

Projects included in this program are subject to Council-approved changes in the MCPS program. Safety assessments and studies are conducted at 6-10 schools per year as part of the Safe Routes to Schools Program funded in the Department of Transportation's (DOT) operating budget. Recommendations from those studies can result in the need for capital improvements that are beyond the scope of the operating budget.

Current projects resulting from the Safe Routes to Schools Program are:

- Veirs Mill Elementary School Access Modifications- FY07 Design and FY08-09 Construction

OTHER DISCLOSURES

- A pedestrian impact analysis has been completed for this project.
- * Expenditures will continue indefinitely.
