Description

This project upgrades Montgomery County Public Libraries' branch network switches and Uninterruptible Power Supply (UPS) units. The project also converts phone systems at the Bethesda, Davis, Potomac, Long Branch and Wheaton branches to newer gateway technology. All upgrades are needed to preserve core library functionality.

Justification

Many library branches have experienced voice and/or data service losses due to poor UPS performance following power surges and brownouts. All network switches and UPS units for both network switches and County PBX telephone system connection are past lifecycle and overdue for replacement. The telephone system connections at five branches are of a type that is no longer supportable by the County's telephone system vendor as of 2011, and replacement parts have become extremely hard to find. Both the Bethesda and Wheaton libraries experienced recent phone service problems and waited three to five days before their defective phone extenders could be replaced. Montgomery County's Department of Technology Services (DTS) has evaluated this project as one involving "critical performance issues."
