PROJECT DESCRIPTION

This project provides for the planning of a Montgomery County Correctional Facility (MCCF) Refresh project to include medical unit modifications and remediation of clogged vents in inmate cells. Medical unit modifications include moving a nurse and correctional officer station to improve sight lines, increase female inmate capacity, increase inmate holding cell space, and other adjustments needed to accommodate implementation of the new State mandated Medication Assisted Treatment program. The project also provides for paint throughout the facility and carpet replacement in administrative areas. Additional funds to design and construct these improvements will be required in a future CIP.

LOCATION

22880 Whelan Lane, Boyds, Maryland, 20841

ESTIMATED SCHEDULE

Initial planning of medical unit modifications and vent remediation will begin in FY23. Funding to support medical unit modification and vent remediation implementation is programmed in FY24 and FY25. Repainting the facility and carpeting is programmed for FY26 and FY27.

PROJECT JUSTIFICATION

MCCF opened in 2003 and has had limited capital improvements despite significant wear and tear. The proposed improvements are required to maintain the facility in good repair and address operational needs. Medical modifications are required to provide a safe and secure environment for inmates receiving medical services to include adequate medical and security supervision. Medical modifications are also required to accommodate new treatment requirements associated with the State mandated Medication Assisted Treatment program. Vent remediation is required to provide adequate air quality for the inmate population.

COORDINATION

Department of Correction and Rehabilitation, Department of General Services, Department of Technology Enterprise Business Solutions, State of Maryland.
