## PROJECT DESCRIPTION

This project will provide a permanent stream crossing in the form of a pedestrian bridge to facilitate movement between Auth Lane and Kersey Road. In September of 2020, members of the Kemp Mill community requested a pedestrian bridge to increase safety and to facilitate the use of an existing natural path by any individuals who are unable to ford the stream. Community members currently use the natural path on a section of unimproved public right-of-way as a shortcut between Auth Lane and Kersey Road. The path includes an "at grade" stream crossing, which is hazardous due to the presence of rocks and steep slopes and cannot be crossed during high stream flow events.

---

## **LOCATION**

The project will be located within existing County owned right-of-way between Auth Lane and Kersey Road.

## **ESTIMATED SCHEDULE**

The project is complete.

## **PROJECT JUSTIFICATION**

The objective of this project is to provide a pedestrian bridge over a stream which bisects an existing natural path currently used by the public. The pedestrian bridge will eliminate hazards typically associated with fording an active stream and will increase pedestrian safety. A feasibility study and associated engineering work for this project was initiated in FY23 to determine the scope, cost, as well as potential environmental and property impacts. The feasibility study concluded that construction of a pedestrian bridge to facilitate pedestrian movement between Auth Lane and Kersey Road is feasible.

## **OTHER**

Feasibility study and engineering design for this project was completed in FY23 and FY24 under CIP Transportation Feasibility Studies project (No. 502303).

## **DISCLOSURES**

A pedestrian impact analysis has been completed for this project.
