## PROJECT DESCRIPTION

This project provides for the design of storm drain improvements in the River Falls neighborhood to reduce the risk of flooding. The area is between Brickyard Road to the west and north, and MacArthur Boulevard to the west and south. The storm drain improvements will provide increased capacity at strategic locations. This project will also include bioretention storm water management facilities for water quality improvements.

## LOCATION

Potomac, MD

## ESTIMATED SCHEDULE

Preliminary engineering was initiated in FY24 under the Storm Drain General CIP (No. 500320). Final design was initiated in FY25 and

---

will be completed in FY27.

## **FISCAL NOTE**

The design of the storm water management facilities will consider implementation costs for improvements to the existing storm drain to a 10-year storm design capacity. In addition, the design will investigate additional mitigation opportunities to reduce the risk of flooding to existing structure.

## **DISCLOSURES**

A pedestrian impact analysis will be performed during design or is in progress.

## **COORDINATION**

Montgomery County Department of Environmental Protection, Montgomery County Department of Permitting Services, River Falls community
