

February 27, 2024

My family has not been able to enjoy our yard or even sit outside during the summer due to the over population of mosquitos due to the stagnant water and wash off chemicals coming from the neighbor's commercial business at his home located at 6412 Damascus Road. I am thankful that Oscar Lyles put up the berm that is keeping the flow of water away that was constantly oversaturating our yard and filling up our septic fields and causing water to back up in our home. Up until the berm this has been an ongoing issue it has caused me to have to get my septic pumped out more than usual and plumbing issues that we have never experienced the sixty years in our home. We are on well water and are uncomfortable with the unsanitary conditions this poses.
