Obsequious, servile, sycophantic, kiss ass = all descriptors for the mass quantities of space gobbling vomitous mass spewed forth in communications advisory committee chair Alan Goldstein's latest "thoughts and opinions"-- a pitifully typical bobble head exhibiting an intense lack of LW knowledge. By example, tather than the imperative necessity of a forensic audit to identify management misuse of member/unit owner funds, clearly displaying subservient idiocy, he insists there be an audit of the 2100+ signature administration building referendum petitions. Goldstein's servile capacity to seek favor from his "masters" coupled with his continued misappropriation of space exhibits an abuse of power - reason enough for a petition calling for his removal as Chair.
