Additional Contact Information

The Distribution Services charges are managed by the utility. In this case the utility is PEPCO. Your utility will still manage your electric bill even if you change to a new energy supplier. The rates for the charges and taxes for the Distribution Services will not change if you change energy suppliers.

Forestville, Maryland

* The cashier's window at this location is open to receive payments on Mondays, Wednesdays and Fridays only

The Generation Services are managed by the energy supplier. In this case the energy supplier is PEPCO. The Generation Service charge will change if the customer chooses a competitive energy supplier.

If you want to purchase RECs, use the Energy Usage History to determine how many RECs you should purchase to offset greenhouse gas emissions associated with your electricity use. Add the kilowatt-hours (kWh) each month to determine your energy use over the course of a year. In this case, the customer would purchase 10,000 kWh to offset their annual electricity consumption.

The Energy Usage History can be help identify high energy use activities. For instance, using the air conditioner in July, August, and September increased this customer's electricity use. Choosing an ENERGY STAR qualified air conditioner or HVAC system (a model that uses less energy than conventional ones) may help to decrease energy costs.
