**PEPCO CUSTOMER SERVICE CENTERS**

The Distribution Services charges are managed by the utility. In this case the utility is PEPCO. Your utility will still manage your electric bill even if you change to a new energy supplier. The rates for the charges and taxes for the Distribution Services will not change if you change energy suppliers.

**PRE-AUTHORIZED TRANSFER ENROLLMENT**

By signing below, I authorize Pepco to electronically deduct the amount of my monthly bill from my checking account each month. The check I send with this signed authorization will be used to set up Pre-Authorized Transfer. I understand that you will notify me each month of the date and amount of the transfer, which will be on or after the due date stated on my monthly bill. I understand that to withdraw this authorization I must call Pepco. I understand that Pepco does not charge for this service, but that my bank may.

1. Check this box
2. Sign and date.
3. Return this slip with your check for this month's payment.

www.wges.com

### Account Details (continued)

#### Services by WGES for Feb 2, 2007 to Mar 7, 2007:

Total Use: 670kwh at \$0.113 per kwh  
Clean Energy Reward

75.71  
3.35CR

#### Charges This Period WGES

\$72.36

The customer changed energy suppliers. In this case the energy supplier is Washington Gas Energy Services. Notice PEPCO, the utility, still manages the electric bill, but the Generation and Transmission Services are now charged by Washington Gas Energy Services.

The "price to compare" is the sum of the Generation Services plus the Transmission Services per kilowatt-hour (kWh). The price for clean energy on this bill is \$0.113 per kWh. Use the price to compare to review electricity costs when considering switching to an alternative energy supplier. This information is posted on each energy supplier's web site.

The Clean Energy Reward through the program is visible as a credit on the electricity bill. In this case, the consumer is buying 50% wind electricity. The total electricity use for the month was 670 kWh. The customer will receive a 1 cent reward for each kWh of clean energy used, or 335 kWh. The total reward is \$3.35.

Before switching to 50% wind electricity through the Clean Energy Rewards program, this customer was paying \$0.0999 cents per kWh. This customer's electric bill for this month would have been \$89.01\*.

Now this customer is buying 50% wind electricity at \$0.113 cents per kWh. After the Clean Energy Reward this customer paid \$5.43 more for electricity this month, or \$94.44\*.

\*Cost includes Distribution, Generation, and Transmission Services
