BACKGROUND INFORMATION: The services provided by the Department of Permitting Service, and its interactions with customers, are delivered through business processes that are technology supported and dependent. The department has used technology in connection with permits, inspections, accounting and reporting since before 1998. Over the years, the department has expanded its use of technology to include development, implementation and support for electronic plans and electronic permits filing, review, processing, management, and fee collection and for improved customer service. In fiscal year 2016, projected revenues exceed the department's adopted budget. The department has concluded that the costs necessary to support administrative and enforcement activities within the development process can be supported by the regular permitting fees collected in fiscal year 2017.
