Montgomery County Regulation on:

ADOPTION OF THE 2012 INTERNATIONAL BUILDING, ENERGY CONSERVATION, MECHANICAL, FUEL-GAS, AND RESIDENTIAL CODES

#### DEPARTMENT OF PERMITTING SERVICES

Issued by:

The County Executive Regulation No. 8-12

Authority: Code Sections 8-13 and 8-14

Supersedes: Regulation No. 14-10 Council Review: Method 2 under Code Section 2A-15

> Register Vol. 29, Issue 4 Comment Deadline: April 30, 2012

> > Effective Date: July 16, 2012

Sunset Date: None

SUMMARY:

This regulation adopts the 2012 editions of the International Building Code (IBC), the International Energy Conservation Code (IECC), the International Fuel Gas Code (IFGC), the International Mechanical Code (IMC), and the International Residential Code (IRC) with amendments. It governs all buildings and structures

within Montgomery County.

ADDRESS:

Department of Permitting Services 255 Rockville Pike, Second Floor Rockville, Maryland 20850-4166

STAFF CONTACT:

Hadi Mansouri, Chief, Division of Building Construction 240/777-6233

BACKGROUND

INFORMATION:

Inasmuch as the International Code Council (ICC) publishes the international series (I-series) of construction standards every three years, and the State of Maryland adopts these standards and obligates its political subdivisions to adopt the standards within a specific time period. Montgomery County must adopt these

standards within the prescribed period.

Sec. 1.

This regulation is adopted pursuant to Sections 8-13 and 8-14 of the Montgomery County Code (MCC), 1994, as amended, and applies to the construction, alteration, addition, repair, removal, demolition, use, location, occupancy, and/or maintenance of all buildings and structures, and their service equipment, within Montgomery County. It supersedes Executive Regulations 14-10, dated February 8, 2011, and all previous regulations adopting the BOCA and the International Code Council (ICC) standards. Its purpose is to

adopt the 2012 editions of the IBC, the IECC, the IFGC, the IMC, and the IRC with amendments necessary to achieve uniformity and consistency with Maryland and Montgomery County laws and ordinances, as well as department/division policies and procedures. Where this regulation differs from the Montgomery County Fire Safety Code it does not preempt or negate any more restrictive provisions of that code.

Sec. 2. Wherever the IBC references the ICC Electrical Code, replace the reference with Chapter 17 of the Montgomery County Code. Wherever the IBC references the ICC/ANSI A117.1, replace the reference with the Maryland Accessibility Code

#### AMENDMENTS TO THE 2012 INTERNATIONAL BUILDING CODE (IBC)

- Sec. 3. Section 101.1. Replace the parentheses and the phrase in the parentheses with "Montgomery County, Maryland."
- Sec. 4. Section 101.2. Number the existing exception as #1 and add a second exception (#2) to read as follows: Existing buildings, as defined by the Maryland Building Rehabilitation Code, undergoing repair, alterations or additions and change of occupancy shall be permitted to comply with the Maryland Building Rehabilitation Code.
- Sec. 5. Sections 101.4.3, and 101.4.4 Delete.
- Sec. 6. Section 101.4.1. Delete and replace as follows: The provisions of the International Fuel Gas Code shall apply to the installation of Liquefied Petroleum gas systems and appliances, fuel gas appliances and related accessories as covered in this code. These requirements apply to the inlet connections of appliances and to the installation and operation of residential and commercial gas appliances and related accessories. The provisions of the International Fuel Gas Code apply to the extent that they are adopted in this regulation.
- Sec. 7. Section 101.4.5. Add the following at the end of the section. "The provisions of the Montgomery County Fire Safety Code shall also apply."
- Sec. 8. Section 102.6. Replace the phrase "the International Property Maintenance Code or" with the phrase "the Montgomery County Fire Safety Code and".
- Sec.9. Sections 103, 111, and 113, except 113.2. Delete.
- Sec. 10. Section 105.1. Add the following: A separate permit is required for each legal address. A separate permit is required for each separate building at a legal address.
- Sec. 11. Section 105.2. Delete all except subsections 105.2.1, 105.2.2, and 105.2.3.

enclosed elevator lobby is provided, exit access corridors shall not be interrupted by an elevator lobby.

- Sec. 32. Section 717.5.3. Replace the first sentence of Exception 2 with the following: "In buildings, other than Group H occupancies, equipped throughout with an automatic sprinkler system in accordance with Section 903.3.1.1 or 903.3.1.2, smoke dampers are not required where:"
- Sec. 33. Section 903.1.1. Delete and replace with the following: 903.1.1 Alternative Protection. Where automatic sprinkler systems are required by this code; and, where water as an extinguishing agent is not compatible with the fire hazard, or is prohibited by a law, statute, or ordinance, the affected area shall be protected by an approved automatic fire-extinguishing system utilizing an extinguishing agent that is compatible with the fire hazard.
- Sec. 34. Section 903.2.1.2. Add a fourth condition to read as follows:
  - 4. The assembly occupancy is one of the following (1) Bars with live entertainment, (2) Dance halls, (3) Discotheques, (4) Nightclubs, or (5) Assembly occupancies with festival seating as defined in the Life Safety Code, 2009 edition.
- Sec. 35. Section 903.2.8. Add an exception to read as follows:

An automatic sprinkler system throughout the building is not required when all of the following conditions are met:

- 1. The building is a mixed use building, that is not otherwise required to be protected throughout by automatic sprinklers;
- 2. There is only one dwelling unit in the building;
- 3. The dwelling unit is separated from the remainder of the building by fire barriers in accordance with Section 707 and horizontal assemblies in accordance with Section 711 having a fire resistance rating not less than 2 hours;
- 4. The means of egress from the dwelling unit is independent from the other occupancies; and,
- 5. The dwelling unit is protected throughout with automatic sprinklers. The automatic sprinkler system installed for this exception shall be permitted to be designed in accordance with Section 903.3.1.3.
- Sec. 36. Section 903.2.8.2. Change "five" to "eight"
- Sec. 37. Section 905.3. After the section title add the following two sentences:

- Sec. 66. Section 1603.1.5. Add to Item 3. The mapped spectral response acceleration parameters for Montgomery County for short-period, S<sub>s</sub>, and 1-second, S<sub>1</sub>, shall be 12.5% and 5.5%, respectively.
- Sec. 67. Table 1607.1 Item 26 Roofs. Modify the uniform live load value for "Ordinary flat, pitched and curved roofs (that are not occupiable)" to 30 pounds per square foot, nonreducible.
- Sec. 68. Section 1607.7.2. Modify Item 1 to read as follows:

  The maximum fire truck operating weight is 85,000 pounds distributed in three axles spaced 19 feet 6 inches and 4 feet 6 inches apart. The transverse wheel distance is 8 feet 2 inches. The front axle weighs 23,000 pounds and rear axles weigh 31,000 pounds each. When the ladder is up, the vehicle is raised and supported on four (4) outriggers spaced 10 feet apart along the length of the vehicle and 16 feet apart in the transverse direction. Depending upon the position of the ladder, any pair of two front, side or rear outriggers apply to the structure a force of 123,552 pounds (61,776 pounds per outrigger in accordance with NFPA 1901, Chapter 20.21.4.2) and the remaining two outriggers apply a force of zero (0) pounds. Outrigger pad dimensions are 2 feet 2 inches wide by 2 feet 6 inches long.
- Sec. 69. Section 1608.2. After the title add the following sentence: "Design ground snow loads for Montgomery County shall be not less than 30 pounds per square foot."
- Sec. 70. Section 1612.3. After the heading, delete the text and replace with the following: The flood hazard map of Montgomery County is established in Section 3 of Executive Regulation 24-06 AM, Floodplain Regulations, per the authority in Article III, Chapter 19 of the Montgomery County Code.
- Sec. 71. Section 1705.2.1. Modify AISC 360 Chapter N, Section N1, First User Note: Delete the sentence starting with "Additionally, where...".
- Sec. 72. Section 1705.2.1. Modify AISC 360 Chapter N, Section N5.5b: After "minimum design loads for buildings and other structures" add "or IBC Table 1604.5".
- Sec. 73. Section 1705.2.1. Modify AISC 360 Chapter N, Section N5.5b: Add at the end of the paragraph "unless a higher percentage is required by the structural engineer of record".
- Sec. 74. Section 1705.2.1. Modify AISC 360 Chapter N, Section N5.5b, User Note: Add at the end of the user note "unless otherwise specified by the structural engineer of record".
- Sec. 75. Section 1705.2.1. Modify AISC 360 Chapter N by deleting Section N7 and replace with IBC Section 1704.2.5.

Originating	Department:	Effective Date:
Departmen	nt of Permitting Services	
	Subsection 1. Change "20 feet" to "12 feet". Add subsection where personal entry is not possible, adequate access for ceach floor level".	
Sec. 104.	Section 506.3.12.2 After the last sentence add "Follow NF additional termination requirements."	PA 96 section 7.8.3 for
Sec. 105.	Section 606.2.1 Under the heading exception, add the words "Return air" to the beginning of the first sentence. After the last sentence add "Supply smoke detectors shall not be required for fan units whose sole purpose is to remove air from the inside of the building to the outside of the building. (NFPA90A)	
Sec. 106.	Section 606.2.1 Add to the words "Supply and" to the beginning of the heading. Add the words "supply and" after the word "in" in the first sentence and add "in the supply air duct or plenum downstream of the air filters and ahead of any branch connections," after (0.9 m3/s) in the first sentence.	
Sec. 107.	Section 607.5.5 exception 2 Replace the first sentence of Exception 2 with the following: "In buildings, other than Group H occupancies, equipped throughout with an automatic sprinkler system in accordance with Section 903.3.1.1 or 903.3.1.2, smoke dampers are not required where:"	
Sec. 108.	Add new section 608 Emergency and Standby Power Sys	stems
Sec. 109.	Add new section [F] 608.1 Installation. Emergency and standby power systems required by the International Fire Code or the International Building Code shall be installed in accordance with NFPA 110, NFPA 111 and the International Fire Code. Existing installations shall be maintained in accordance with the original approval.	
Sec. 110.	Add new section [F] 608.1.1 Stationary Generators. Stationary emergency and standby power generators required by the International Building Code and the International Fire Code shall be listed in accordance with UL 2200.	
Sec. 111.	Add new section [F] 608.2 Standby Power. Where the standby system is a generator set inside a building, the system shall be located in a separate room enclosed with a 2-hour fire barrier constructed in accordance with section 707 or horizontal assemblies constructed in accordance with section 712 of the International Building Code, or both. System supervision with manual start and transfer features shall be provided at the fire command center.	

Add new section 608.2.1 Ventilation Air. Ventilation air shall be supplied directly from a

Delete "swimming" and change 24 (610 mm) to 18 inches (457 mm). Item 8: Add "playhouses, treehouses or similar structures" after first word. Delete Item 10. Add Item 11: Replacing windows and doors without changing the size of openings and without reducing the net clear opening dimensions. Add Item 12: Replacing roofing or siding materials with in kind materials. Delete Sections R105.3.1.1, R105.3.2, and R105.5.

- Sec. 124. Section 107. Delete.
- Sec. 125. Section R108.1. Replace the second sentence with the following: Required fees shall be paid for each separate permit application. Sections 108.2 through 108.5. Delete.
- Sec. 126. Sections R109.1 through R109.1.6. Delete all except R109.1.2, R109.1.5, and R109.1.5.1 and replace with the following: R109.1 Types of inspections. The following inspections must be conducted for all buildings and structures:
  - 1. Sign: The sign must be posted on the property within 3 days after the permit issuance date and must remain posted on the property for 30 days. The sign must be located on the side of the lot/parcel, which provides principal access to the street or right-of-the-way. It must be conspicuously posted not more than 5 feet from the front property line and mounted at least 30 inches, but not more than 60 inches, above the ground. NO BUILDING INSPECTION WILL BE PERFORMED PRIOR TO THE APPROVAL OF THIS INSPECTION.
  - 2. Footings: Conducted prior to concrete placement and after excavations for all footings and thickened slabs are completed; after form work, reinforcing steel, concrete-encased electrode (for new dwellings), and grade stakes are in place; and after sediment control measures are installed according to the approved sediment control plan.
  - 3. Waterproofing/Foundation Drainage: Conducted after the exterior walls have been waterproofed and foundation drainage system has been installed. Insulation, if used, shall be in place and protected as required. If interior drain tiles are to be used, weep holes (2 in. minimum diameter, 6 feet on center) must be installed. A second inspection may be required prior to backfilling the interior drainage system.
  - 4. Concrete slab-on-ground floor: After the installation of the slab base, vapor retarder, slab edge insulation, and a minimum 3 in. schedule 40 PVC, or equivalent gas tight pipe inserted into a 3 in. tee embedded into the slab base for the venting of RADON GAS and labeled adequately. Where the sump crock is to be used for the venting of RADON GAS, it must be in place at the time of the inspection. Additions to an existing building that has the final inspection older than a year does not require a radon control system.
  - 5. Wall check (house location survey): The owner must have a house location survey

Department of Permitting Services	

prepared and certified by a Maryland Registered Land Surveyor and must submit a copy to the building official for approval prior to erecting the framing. A wall check not identified by a premise address and permit number will not be accepted. A FRAMING INSPECTION WILL NTO BE CONDUCTED WITHOUT AN APPROVED WALL CHECK.

- 6. Masonry fireplace/chimney: Conducted after the fireplace and first flue liner section are completed.
- 7. Wall Bracing: Conducted prior to installation of weather-resistive barrier (house wrap).
- 8. Framing ("close-in"): Conducted after the completion of all framing, air sealing, rough wiring, fire sprinkler system installation and testing, plumbing, gas and mechanical distribution systems (as required) but prior to installing exterior finish, insulation and drywall. Roof is to be completed and weatherproof. The exterior finish is not to be installed until framing (close-in) has been approved. When plumbing/gas work is part of the construction, a Washington Suburban Sanitary Commission (WSSC) plumbing inspection must be approved before requesting a framing inspection. The building, electrical, and mechanical inspections must be requested at the same time. WHEN FLOOR FRAMING IS LESS THAN 36 INCHES (914 MM) ABOVE THE SURFACE BELOW, A FRAMING INSPECTION SHALL BE REQUESTED PRIOR TO INSTALLATION OF ANY FLOOR MATERIALS.
- Insulation: Conducted after the FRAMING (close-in) inspection has been approved to verify that the installed insulation R-value matches the approved plans or specifications for the building.
- 10. Swimming Pool Bonding Conducted when the pool has been formed with the rebar installed and bonded prior to placement of concrete or backfill. During construction pool excavations must be completely enclosed by a 42 in. high safety fence AT ALL TIMES when work is not being performed in the pool.
- 11. Well and Septic Systems: Where a building is served by an on-site water system or an on-site sewage disposal system, prior to the final inspection, an "Interim Certificate of Portability" or "Certificate of Portability" and/or a "Certificate of Sewage Disposal", as appropriate, must be issued by the Department. Where a building is served by an on-site water system or an on-site sewage disposal system, any condition of the permits issued for those systems shall be satisfied prior to the final inspection.
- 12. Final and U/O: Conducted after the building is completed and ready for occupancy, but prior to settlement on the house, unless the contract owner waives the requirement for final inspection and provides the building official with a written copy of the waiver. For new construction, final electrical, mechanical, and sprinkler inspections must be

Offices of the County Executive. 101 Monroe Street. Rockville, Maryland 20850

Adoption of the 2012 IBC, IRC, IECC, IMC, IFGC	
Originating Department:	Effective Date:
Department of Permitting Services	

requested with the final building inspection, and the address numbers must be displayed in accordance with the requirements of the fire code. Note: A final approval from WSSC shall be obtained for all plumbing/gas installations prior to requesting final building inspections from the County. The final approval for sprinkler final inspection, duct blaster and blower door tests certifications, if required, shall be obtained prior to the request for a final inspection. If an owner refuses access within a reasonable time after a house is completed, the building official may close the permit file, but this action will not relieve the owner from any obligation to comply with applicable codes. The final inspection must be requested and approved before a building (or portion thereof) is used or occupied.

- 13. Partial Inspection: Conducted upon request. A \$121.00 fee must be paid, at the DPS office, when scheduling this inspection.
- 14. Re-inspection: Any of the above inspections disapproved twice for the same violation will be subject to a re-inspection fee, as established in the Schedule of Fees for Permits, Licenses and Certifications, which must be paid before any further inspections will be performed at the building site.
- Sec. 127. Sections R110.2 Delete.
- Sec. 128. Sections R110.3 Item 3. Delete the words "name" and "owner" and add "building or structure". Delete Item 6. Delete Item 8.
- Sec. 129. Sections R110.4 Delete.
- Sec. 130. Sections R112. Delete except R112.2.
- Sec. 131. Section R202. To the definition dwelling unit add: A dwelling unit may contain a family day care home, group day care home, a home occupancy or home health care practitioner complying with Chapter 59, Montgomery County Code. Note: A certificate of use and occupancy is required before any space dedicated for home occupancy or home health care practitioner can be used or occupied. See Chapters 8 and 59, Montgomery County Code.

Delete words "for living" from the definition of "Guestrooms"

Delete definition of "Lodging House"

Add definition for Storage, finished: A finished area having no more than two (2) 120V outlets and no other wiring methods (CATV, satellite, data communication, etc.), excluding lighting requirements.

- Sec. 143. Section R321.1 Add a new sentence. Walls and ceiling of elevator shafts shall be covered with by not less than 5/8-inch (15.9 mm) Type X gypsum board.
- Sec. 144. Section R321.3. Delete.
- Sec. 145. Section R322.1. To the first paragraph add the phrase "and the Floodplain District Requirements, Article III, Chapter 19, of the Montgomery County Code, and Executive Regulation 24-06 AM."
- Sec. 146. Add a new section as follows: Section R401.5. Special conditions. Design and construction of all buildings and structures within 1000 feet of a known municipal solid waste (MSW) landfill site that does not currently have an operational land fill gas (LFG) monitoring and removal system, shall require special engineering of foundation systems, including walls and floor slabs, to provide for the safety of occupants against hazards from LFG concentration. Special subsurface investigations shall be conducted, at the owner's expense, by an approved and qualified engineer or geologist to determine the extent of the potential hazard. The study must identify the potential hazards, and mitigation plans for the site must be incorporated into the construction documents and approved prior to issuance of a building permit. All buildings and structures within 1000 feet of the boundary of a MSW landfill shall be equipped with a methane gas detector with an alarm activation level of 20% of the lower explosive limit (LEL-1% by volume).
- Sec. 147. Section R403.1.4.1. Exception 1: Add the phrase: "excluding garages and carports, used as tool and storage sheds, playhouses and similar uses and not exceeding change 600 to 400 square feet or less in floor area and an eave height of 10 feet (3048 mm) or less shall not be required to be protected. Exception 2. Delete. Exception 3. Delete.
- Sec. 148. Section R405.1. Add to the title "exterior drainage system". Delete the exception. Add new subsection R 405.1.1. Concrete or masonry foundation interior drainage system. Weep holes at least 2 inches (51 mm) in diameter, spaced at a maximum of 6 feet (1828 mm) on center shall be installed in the footing connecting into the interior drains. Weephole inlets shall have a minimum of 6 inches (153 mm) of gravel for the full perimeter of the foundation, extending at least 12 inches (306 mm) from the inlets and covered by a layer of approved filter membrane.
- Sec. 149. Section R406.1. Delete.
- Sec. 150. Section R406.2. Delete the first sentence and replace with the following: Exterior foundation walls retaining earth and enclosing usable spaces below grade must be waterproofed with an approved waterproofing system or a membrane extending from the top of the footings to finished grades. Delete items 1, 2, 3, and 4. Add. "Waterproofing system shall be installed as required in the current International Code Council Evaluation

Section R4504. Excavation and fill for buildings and structures shall be constructed or protected so as not to endanger life or property.

Section R4505. Fill supporting foundations. A building permit is required when fill is used to support the foundations of any building or structure. Special inspections of compacted fill shall be in accordance with Section 1704.7 of the International Building Code 2012.

Section R4506. Protection of Pedestrians

Section R4506.1. Protection required. Pedestrians shall be protected during construction, remodeling and demolition activities by a barrier when the distance from the construction to the lot line is 5 (1524 mm) feet or less.

Section R4506.2. Adjacent to excavations. Every excavation on a site located 5 feet (1524 mm) or less from the street lot line shall be enclosed with a barrier. Where located more than 5 feet (1524 mm) from the street lot line, a barrier shall be erected when and where required by the building official.

Section R4506.3. Barriers. Barriers shall be at least 42" high, have adequate strength, and shall be of a type which will warn of potential danger.

Section R4507. Protection of Adjoining Property. Adjoining public and private property shall be protected from damage during construction, remodeling and demolition work. Protection shall be provided for footings, foundations, party walls, chimneys, skylights and roofs.
