

# MONTGOMERY COUNTY DEFERRED COMPENSATION PLAN INVESTMENT OPTIONS

## PERFORMANCE UPDATE

AS OF MARCH 31, 2017

### UNDERSTANDING INVESTMENT PERFORMANCE

As you review this update, please remember that the performance data stated represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity at 1-800-343-0860 or visit [www.mysavingsatwork.com](http://www.mysavingsatwork.com) (log in, choose plan, select "Investment Choices & Research," and then pick investment option).

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of fund figures are reported as of the inception date to the period indicated. These figures do not include the effects of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plan. If sales charges were included, returns would have been lower.

## EXPENSE RATIO

A mutual fund expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. For other types of investments, the figure in the expense ratio field reflects similar information, but may have been calculated differently than for mutual funds. Mutual fund data comes from the fund's prospectus. For non-mutual fund investment options, the information has been provided by the plan sponsor, the investment option's manager or the trustee. When no ratio is shown for these options it is because none was available. There may be fees and expenses associated with the investment option. Expense information changes periodically. Please consult NetBenefits for updates.

## SPECIFIC FUNDS

Morningstar, Inc., provided data on the non-Fidelity mutual funds. Although the data is gathered from reliable sources, accuracy and completeness cannot be guaranteed by Morningstar.

<sup>1</sup> This investment option is not a mutual fund.

<sup>2</sup> On February 6, 2013, an initial offering of the Managed Income Portfolio Class 2 took place. Returns and expenses prior to that date are those of the Managed Income Portfolio Class 1. Had class 2 expenses been reflected in the returns shown, total returns would have been higher.

<sup>3</sup> Management Fee includes the costs associated with managing the investments in the pool. The management fee does not include the wrap contract fees, which are paid to third party wrap providers and do not result in any additional compensation to Fidelity. The wrap contract fees are not separately stated but are included in the Expense Ratio and do reduce returns.

<sup>4</sup> Expense Ratio (Gross) includes management and wrap contract fees. For certain investments, it may also include distribution fees. Please note that the Gross and Net Expense Ratio are the same for this investment.

<sup>5</sup> On December 22, 2014, an initial offering of the Class Z took place. Returns and expenses prior to that date are those of the Institutional Class. Had Class Z expenses been reflected in the returns shown, total returns would have been higher.

<sup>6</sup> On May 9, 2008, an initial offering of the retirement (K) class took place. Returns and expenses prior to that date are those of the non-K, non-advisor class. Had K class expenses been reflected in the returns shown, total returns would have been higher.

<sup>7</sup> The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/04/2008. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 03/10/1970, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

<sup>8</sup> Performance shown for Class N is from its inception date which is 05/31/2011 and reflects the Class N's fees. Prior to 05/31/2011 performance shown is that of the State Street S&P 500 Index Fund - Class C which reflects the Class C fees. The Total Annual Operating Expense Ratio for Class C was .06% and reflects all indirect and direct fees and expenses associated with the Class C Fund. The inception date for Class C is 10/01/1996.

<sup>9</sup> The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/04/2008. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 07/01/1998, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

For important disclosures, please see last page(s) of this report.

<sup>10</sup> The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 01/27/2012. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 12/22/1969, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

## INVESTMENT RISK

<sup>11</sup> Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments.

<sup>12</sup> Target date investments are generally designed for investors expecting to retire around the year indicated in each investment's name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risk associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.

<sup>13</sup> In general the bond market is volatile and bonds entail interest rate risk (as interest rates rise bond prices usually fall and vice versa). This effect is usually pronounced for longer-term securities. Bonds also entail the risk of issuer default, issuer credit risk and inflation risk.

<sup>14</sup> Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.

<sup>15</sup> Investments in mid-sized companies may involve greater risk than those of larger, more well known companies, but may be less volatile than investments in smaller companies.

<sup>16</sup> Investments in smaller companies may involve greater risk than those in larger, more well known companies.

<sup>17</sup> Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.

## MARKET INDICATORS

Indices are unmanaged and you cannot invest directly in an index

**DJ Industrial Average** The Dow Jones Industrial Average (DJIA) is an unmanaged price-weighted index and is the most widely used indicator of how the country's industrial leaders are performing. Also known as "the Dow," this is a formula based on the stock prices of 30 major companies chosen from sectors of the economy most representative of our country's economic condition.

**MSCI EAFE (Net MA)** The MSCI Europe, Australasia and Far East Index (net MA tax) is an unmanaged market capitalization-weighted index of equity securities of companies domiciled in various countries. The index is designed to represent performance of developed stock markets outside the United States and Canada and excludes certain market segments unavailable to U.S. based investors. The index returns for periods after 1/1/1997 are adjusted for tax withholding rates applicable to U.S.-based mutual funds organized as Massachusetts business trusts.

**S&P 500** S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

**Russell 2000** The Russell 2000® Index is an unmanaged market capitalization-weighted index of 2,000 small company stocks of U.S. domiciled companies.

**Before investing in any mutual fund, consider the investment objectives, risks, charges, and expenses. Contact Fidelity for a mutual fund prospectus or, if available, a summary prospectus containing this information. Read it carefully.**
