The unexpected and sometimes unquantifiable costs:

Finally, there are several other costs that you need to remember:

- **Psychological Impact:** embarrassment, shame, guilt, worry, or an individual's trustworthiness has been broken.
- **Lost time = lost money.** People who've gotten DUIs report missing a lot of work (and therefore losing a lot of income) dealing with their mistake, as a result of court dates, community service and sometimes a jail sentence. That doesn't even count the lost free time.
- **It's not good for the résumé.** A DUI lingers on your criminal record and most employers will do a criminal background check to see if you have any convictions. This could result in a disqualification for jobs that may require driving as part of the job description. One could lose their current job that involves driving as part of the job description. A DUI can affect a many possibilities with your current job or future jobs.
- **DUI and College Applications.** Individuals who have been convicted of an underage DUI must list it on their college applications. This can prevent the student from being accepted. Those convicted of an underage DUI who have not listed it on their application are subject to immediate dismissal from the institution if it is discovered.
- **Transportation Impact.** In Maryland a minimum 45 day administrative license suspension occurs immediately. Driving privileges can be restored during a suspension, but drivers must demonstrate special hardship, and the restored privileges often come with limitations. This could result in an accumulation of daily bus and/or metro fees. This could also impact your family or friends if you need to rely on them for transportation resulting in increased gas fees and wear and tear on their vehicles on your behalf.
- **Driving Record & Insurance Impact.** You will receive 12 points on your on your driving record and be required to have Maryland SR22 (High Risk Auto Insurance | DWI/DUI) insurance. Maryland SR-22 auto insurance is usually required for a period of 3 years after a DUI -DWI - drunk driving - alcohol related driving conviction and can be very expensive.
- **Damages & Liability Responsibilities.** The driver who was at fault and caused the accident must pay damages to anyone (other driver, passenger, pedestrian) who was injured or harmed by the accident. There are two main categories of damages in Maryland car accident law, property damage and personal injury damages. The at-fault driver must pay to have the damaged vehicle repaired. If injury occurred you will also be responsible to cover the medical bills caused by the accident, the income the injured lost as a result of the accident and an additional amount for pain, suffering, inconvenience and the like. If the driver is under 21 parents and their assets could be impacted by costs or by lawsuits.
