Mr. Sidney Katz, President
Montgomery County Council
100 Maryland Avenue
Rockville, MD 20850

Dear Council President Katz:

Each year, the Maryland Department of Transportation (MDOT) compiles a Consolidated Transportation Plan (CTP) that outlines the State’s capital investment program. The projects included in the CTP are determined by MDOT based on their assessment of project priorities. A component of their analysis is letters provided by Counties and other jurisdictions that outline local priorities. Montgomery County last updated its priorities in 2017. Since that time, numerous factors have changed including the initiation of construction of the Purple Line and the US 29 Flash. Additionally, Vision Zero has been adopted by the County and MDOT has advanced a Traffic Relief Plan for I-270 and I-495. These significant changes, coupled with change of County Executive and Council indicate that it is time to update the County Priorities Letter.

On behalf of County Executive Elrich, the Montgomery County Department of Transportation began work on a new priorities letter in the fall of 2019. A preliminary draft was developed and refined to reflect the priorities of the Executive Branch, including MCDOT. This draft was provided to the County’s State Delegation for review and comment and was provided to the Montgomery County Planning Board. In December 2019, the Planning Board was provided with a briefing and held a work session to discuss the preliminary letter. Additionally, several suggestions were received from members of our State delegation.

It is now time for the County Council to review the preliminary draft, with the benefit of the comments from the Planning Board and our Delegation. Once the Council has reviewed the letter and provided its suggestions, MCDOT will develop a new letter that is informed by the collective input, ultimately leading to a final version signed by both the Executive and Council President. To assist with the Council’s review, the following items are included with this letter:
• The November 18, 2019 draft of the Priorities Letter circulated to the State Delegation and the Planning Board
• A matrix summarizing the comments received and the Department’s recommendation regarding the comments
• The Planning Board’s Comment Letter on the November 18, 2019 draft;
• The 2017 Priorities Letter now on file with MDOT; and
• MDOT’s schedule for developing the CTP
• Transmittal memorandum to the State Delegation.

In addition to these specific suggestions, references to the I-270/I-495 Traffic Relief Plan/Managed Lanes Study project need to be updated to reflect the current status of these State projects as the letter is readied for signature.

MCDOT looks forward to working with you and your colleagues on the County Council to complete review of the letter. As indicated in the chart summarizing the MDOT CTP process, they are seeking our updated letter by April 2020 to inform the subsequent CTP. If you have any preliminary questions, please feel free to contact me at your convenience.

Sincerely,

Christopher Conklin, P.E., Director
Montgomery County Department of Transportation

<tbody>
<tr>
<td>Planning Board</td>
<td>Identify and prioritize all Vision Zero projects on State Highway Corridors (highway, transit, bicycle and pedestrian) including projects with Vision Zero components.</td>
<td>Vision Zero is an overarching issue reflected throughout the various project categories within the letter. Vision Zero projects are relevant to most State and many County corridors. To emphasize the pressing need for Vision Zero coordination and implementation, we recommend a new primary heading on Page 1 “Vision Zero” that describes this priority and the need for state engagement and a significant commitment of funding. This section will reference particular projects where Vision Zero is a major factor.</td>
</tr>
<tr>
<td>Planning Board</td>
<td>Identify the need for a dedicated funding source for Vision Zero projects.</td>
<td>Incorporate into “Vision Zero” section described above, emphasizing the need for State investment in pedestrian infrastructure and safety improvements.</td>
</tr>
<tr>
<td>Planning Board</td>
<td>Add Shady Grove Station (Planning) as a new Commuter Rail Expansion recommendation (#4).</td>
<td>Commuter rail connectivity at Shady Grove Station would represent a significant enhancement in multimodal connectivity, likely surpassing that of other potential stations. Understanding the physical and operational opportunities and constraints would be valuable. Suggest adding this as Priority 3 in this section.</td>
</tr>
<tr>
<td>Planning Board</td>
<td>Add MD 390 (16th Street) Road Diet between Spring Street and MD 97 (Georgia Avenue) as a new State Highways recommendation (#3).</td>
<td>Do not recommending addition of this project at this time. It is a relatively new master plan recommendation. This project is could be a candidate for a Facility Planning feasibility and concept study, which would guide its future prioritization. MCDOT is currently proposing to add sidewalks in this area as part of the Purple Line BIPPA project</td>
</tr>
<tr>
<td>Planning Board</td>
<td>Separate the 28/198 State Highways Recommendation for MD 198 as #6 and MD 28 as #7</td>
<td>Concur with this recommendation.</td>
</tr>
<tr>
<td>Planning Board</td>
<td>Request SHA consideration of removal of some planned interchanges, in particular the Musgrove Interchange) from the CTP as part of the US 29 Comprehensive Plan project (#6)</td>
<td>Concur. The intention of this priority is for a re-evaluation of past recommendations to instead maximize investments that improve functionality of BRT and benefit corridor operations as a whole.</td>
</tr>
<tr>
<td></td>
<td>Planning Board</td>
<td>Request a commitment for dedicated transit funding from the Managed Lanes/Traffic Relief Project.</td>

January __, 2020

Peter K. Rahn
Secretary, Maryland Department of Transportation
7201 Corporate Drive, P.O. Box 548
Hanover, MD 21076

Dear Secretary Rahn:

Montgomery County is a diverse community with many transportation needs. As always, we appreciate our cooperative relationship with the State of Maryland so that, together, we can meet the needs of our residents and businesses. MDOT has continued to make significant contributions to the transportation network in Montgomery County, including providing needed funding for WMATA, completing the interchange of Randolph Road and Georgia Avenue, initiating the I-270 Innovative Congestion Management project, beginning construction of the Watkins Mill interchange, partnering with the County for Vision Zero, and advancing construction of the Purple Line.

Notwithstanding these accomplishments, our County continues to need expanded investment in its transportation system. For the FY2021-2026 Consolidated Transportation Program (CTP), we have organized our priorities by emphasis area to aid in programming of future State resources toward the transportation needs in Montgomery County.

**Bus Rapid Transit (BRT) Implementation**

Bus Rapid Transit is a key element of the County’s Master Plan. FLASH on U.S. 29 — the first of its kind in Maryland - is advancing as a Federally and County-funded project, expected to open in 2020. Montgomery County will need MDOT assistance and cooperation to continue advancement our BRT system that is critical to expanding the economy of Maryland in Montgomery County.

The Corridor Cities Transitway (CCT), a long standing State project, needs to be restored as a project in the CTP. This project is a key ingredient to the success of the biotechnology industry in the Great Seneca Science Corridor and State engagement in its implementation is important to the economic strength of Maryland.

We thank the State for completing repairs to the shoulders on U.S. 29 and ask that the shoulder condition remain a high maintenance priority on this roadway. We request State participation in the implementation of strategies to manage congestion and improve transit travel time reliability between
Tech Road and Silver Spring to be determined through the ongoing County-led US 29 Mobility and Reliability Study.

Building upon prior MDOT planning activities, the County has initiated design of BRT on Maryland 355 between Clarksburg and Bethesda and on Maryland 586 (Veirs Mill Road) between Rockville and Wheaton. These to projects will unlock the redevelopment potential of White Flint and will improve transit service to the thousands of daily transit riders who depend on services connecting Wheaton and Rockville. As both corridors are State Highways, MDOT’s engagement during design and construction and financial participation in these projects will be important.

In the next few years, planning will be initiated for the Maryland 650 (New Hampshire Avenue) corridor and the North Bethesda Transitway. BRT on New Hampshire Avenue is a candidate State-led project as it is located in Montgomery and Prince George’s County and connects into the District of Columbia. In addition, this corridor provides vital links to the Food and Drug Administration White Oak Headquarters, a key economic engine for the East County. The North Bethesda Transitway will also provide a substantial economic opportunity by linking the Rock Spring area to White Flint.

**Locally Operated Transit Support**

We thank MDOT for its capital and operating support of the Montgomery County Transit System including Ride On, Ride On Extra, the Flex and, starting in 2020, the Flash. Sustained financial support from MDOT is critical to providing quality transit service in Montgomery County. Furthermore, the County is moving toward deployment of electric buses as a regular component of its transit fleet. To enable this transition from traditional fuels, we request State technical and financial assistance with the installation of electric charging infrastructure at the three County transit depots.

**Washington Metropolitan Area Transit Authority (WMATA) Investment**

MDOT should be commended for providing major capital and operating support to WMATA. The County has identified that providing a northern headhouse at the White Flint Station and constructing a new passageway under MD97 (Georgia Avenue) at the Forest Glen Station are high priority improvements to WMATA Metrorail stations within the County. We ask for MDOT’s advocacy to include these projects in the WMATA Capital Program. We also ask for State support of implementation of bus priority treatments as called for in the draft WMATA Bus Transformation Study Strategic Plan.

**Commuter Rail Expansion**

The MARC system operated by MTA is important for moving commuters to Rockville, Silver Spring and Washington, D.C. and the system could provide even greater benefit though enhancements to the service and increasing the system’s accessibility. Priorities for MARC enhancements include:

1. **Boys Station Expansion**: (Design and Construction) Recently, the County acquired the property adjacent to the Station with the expectation of making facility improvements in partnership with MDOT/MTA.

2. **Midday and Off-Peak Service**: (Planning and Operating) MARC service provides an option for peak period, peak direction commuting. As travel patterns change and reverse commuting becomes more significant, providing more midday and off-peak trains will increase the value
MARC service provides to Montgomery County and will increase the attractiveness of employment in Maryland for the growing population in the District of Columbia.

3. **White Flint Station** (Planning). The White Flint Sector Plan calls for construction of a new MARC Station and we request that MTA advance study of the station.

**Pedestrian and Bicycle Safety and Facilities**

Improving pedestrian and bicycle safety as highlighted in our Vision Zero Program, creating a safe and attractive walking environment in our key growth areas, and the implementation of Bikeshare as a permanent component of our transportation system are critical needs for State support.

1. **Pedestrian/Bicycle Safety Implementation on State Highways**: (Design and Construction) We request that the State increase funding to address sidewalk gaps, crosswalk conditions, trail crossings, and other issues in support of the County's Vision Zero Action Plan. Many of our highest-need locations are on State highways.

2. **Bicycle and Pedestrian Priority Areas (BiPPAs)**: (Planning, Design and Construction) The County has identified over 30 BiPPA's and has prioritized five for early actions. To be effective, the County will need State cooperation and financial support to implement improvements to State infrastructure in these priority areas. A high priority activity within this program is to make improvements on access routes to the Purple Line and State funding for these improvements will help accelerate their construction.

3. **Bikeshare Program Support**: (Grants) Federal, State and private grants have been essential for Bikeshare in Montgomery County, a system that has now grown to 80 stations. Bikeshare contributes to achieving non-auto drive mode share (NADMS) goals in focus-areas within the County and provides an excellent complement to local and regional transit systems. State operating support for this system will help secure its long-term future.

4. **Intercounty Connector (ICC) Multiuse Trail**: (Planning). A multiuse trail was constructed concurrent with the ICC for much of its length. We request that the State begin planning for completion of the gaps between Layhill Road and Notley Road and between MD 650/New Hampshire Avenue and Briggs Chaney Road.

**State Highways**

The following projects represent our highest priorities for improvements to State Highways:

1. **MD 97 (Georgia Avenue) Forest Glen/Montgomery Hills Improvements**: (Design and Construction) We strongly encourage MDOT to advance the recommendations of its planning and NEPA study into design and construction. When completed, this project will improve a major gateway into the Silver Spring Central Business District and improve safety and accessibility within the Montgomery Hills and Forest Glen communities.

2. **MD 355 (Frederick Road) Improvements from MD 27 to Stringtown Road**: (Planning) Expanding MD 355 consistent with the Clarksburg Master Plan, may be the most cost-effective and least impactful way of improving access to and from this community. In addition to capacity, the improvements need to address pedestrian and bicycle connectivity, access to
schools, and transit needs. We look forward to reviewing the results of the initial planning that MDOT is now advancing and to defining a project that addresses the needs on this corridor.

3. **Accelerated Traffic Signal Modernization:** (Design and Construction) The State traffic signal system contains many locations with structural impairment, inefficient incandescent fixtures, underperforming detection, and pedestrian crossing configurations that do not meet today’s needs. MDOT/SHA and Montgomery County would benefit from acceleration of traffic signal modernization in the County, including deployment of additional adaptive traffic signal controls on key corridors within the County.

4. **MD 117 (Clapper Road) Improvements:** (Design and Construction) After construction of the Watkins Mill interchange is completed, traffic patterns of MD 117 will change substantially. MDOT completed planning activities for improvements to MD 117 between the Seneca Creek State Park entrance and the I-270 southbound on-ramp. Montgomery County submitted a Chapter 30 funding application for this project in 2018 and 2019. With the opening of the Watkins Mill Interchange, implementation of these improvements will be important to accommodate the changes in Interstate access.

5. **MD 97/Georgia Avenue and MD 28/Norbeck Road Interchange:** (Design) The intersection of MD 97 and MD 28 is constrained and congested, particularly due to the proximity of the MD 200 Interchange just to the north and the intersection of MD 28 and MD 115 just to the west. Improvement to this location is important for facilitating access between Olney and Silver Spring and for the connection from Rockville to MD 200. We request that the State reinitiate design of an interchange at this location.

6. **U.S. 29 Comprehensive Plan:** (Planning, Design and Construction) Traffic operations at several locations on U.S. 29 between Stewart Lane and MD 198 in Montgomery County result in recurring congestion and safety concerns. We request a comprehensive assessment of the signalized intersections on the U.S. 29 corridor, taking into consideration community preferences, approved land use plans, BRT operations, pedestrian and bicycle needs, traffic safety and throughput.

7. **MD 28/198 Improvements (Norbeck Road and Spencerville Road):** (Design and Construction) The State is still working on an alternatives analysis for the 11-mile MD 28/198 corridor between MD 97 (Georgia Avenue) and I-95 in Prince George’s County. Montgomery County requests that the State complete the planning study and advance elements of this corridor into design and construction.

**Burtonsville:** Concepts for improvements between Old Columbia Pike and U.S. 29 through the Burtonsville business district have been identified. The County requests that the State select and refine a design concept for this portion of the corridor that is supportive of the Burtonsville Crossroads Neighborhood Plan (2012) goals. In Burtonsville, the project should also identify ways to reduce the width of Old Columbia Pike north of MD 198 to better match reduced traffic demands and to reduce the barrier formed by this roadway.
Draft 11/18/2019

**MD 97 to MD 200:** At the west end of the corridor, we request that the State fill remaining gaps to complete the pedestrian and bicycle network along and across MD 28 between MD 97/Georgia Avenue and Wintergate Drive.

8. **MD 108/Laytonsville Bypass:** (Planning) The Town of Laytonsville has planned a bypass route for MD 108 around the west side of the town. This bypass, now partially constructed, will alleviate congestion at the intersection of MD 108 and Brink Road/Sundown Road, improving the character of the historic center of town.

**Interstate Program**

The County has been an active participant in the MDOT/SHA process for these projects. We agree with the need to improve the performance of these corridors, including expanded transit options, and we remain very concerned about the impacts of highway expansion, particularly where these are projected to be most acute. We are encouraged by the recent announcement of a coordinated approach between Maryland and Virginia to address the American Legion Bridge and to connect the proposed Capital Beltway modifications in Maryland to those planned by Virginia. Ideally, expanded facilities on the bridge will implemented at the same time as the I-270 facilities approved in 2019 by the Board of Public Works as the first phase of the Traffic Relief Plan Public Private Partnership (P3). We also encourage MDOT to include the Dorsey Mill Road bridge in Germantown and a new interchange and Little Seneca Parkway in Clarksburg into the I-270 project, for which we believe reversible lanes will be most effective. In all cases, the modification of the Interstate system needs to consider the performance of the local road network, include expanded transit services, and include bicycle and pedestrian infrastructure on the crossings of the freeway facilities.

Montgomery County remains seriously concerned with the implementation of four additional toll lanes on I-495 between the east spur of I-270 and I-95 and requests that the State reconsider implementation of congestion management strategies like ramp metering and peak-period shoulder use, or other spot improvements that are respectful of our natural resources and communities on this facility. We believe MDOT should revisit its decision to eliminate the MD 200 alternative and other less environmentally-damaging alternatives between I-270 and I-95.

We thank you again for your continued partnership in meeting the needs of Maryland residents and businesses in Montgomery County. If you have questions about our priorities, please contact us.

Sincerely,

Marc Elrich
County Executive

Nancy Navarro
County Council President
December 11, 2019

Mr. Christopher Conklin, PE
Director, Montgomery County Department of Transportation
Council Office Building
101 Monroe Street
Rockville, Maryland 20850

Re: 2020 County Transportation Priorities Letter

Dear Mr. Conklin:

On December 5, 2019, the Planning Board reviewed your draft County Transportation Priorities letter and provided comments for your consideration. We are enclosing the staff report from the Planning Board item considered on December 5, 2019 and a copy of the presentation slides provided by Planning staff at that meeting. The Planning Board offers the following comments:

1. Identify and prioritize all Vision Zero projects on state highway corridors (highway, transit, bicycle, and pedestrian), including projects with Vision Zero components. Recent collaborative design work conducted on MD 97 (Georgia Avenue) in Wheaton and Aspen Hill between MDOT SHA and MCDOT should be used as a model for other state highway corridors.

2. Identify the need for a dedicated funding source for Vision Zero projects. No new revenue was added with HB855 when Vision Zero was adopted by the state of Maryland, and the financial commitment needed to fund Vision Zero efforts is significantly greater than the previous Toward Zero Deaths state policy.

3. Add a new Commuter Rail Expansion recommendation on page 3 of your letter as follows:

   #4 Shady Grove Station (Planning). The Shady Grove Sector Plan calls for the integration of new MARC stations into the MARC Rail network. We request that MTA advance study of the station.

4. Add a new State Highways recommendation on page 4 as follows:

   #3 16th Street (MD 390) Road Diet between Spring Street and MD 97 (Georgia Avenue) — Implement a road diet on 16th Street between Spring Street and MD 97 to provide two through lanes in each direction (one lane reduction in each direction), consistent with the Greater Lyttonsville Sector Plan and the Forest Glen Montgomery Hills Sector Plan.

5. Separate the State Highways recommendation for the MD 28 and MD 198 corridors (they are currently one MDOT project), as we anticipate that implementation will be conducted in phases as separate projects. Place the MD 198 project as recommendation #6 and the MD 28 project as recommendation #7.
6. Request that MDOT SHA consider, as part of the US 29 Comprehensive Plan project, the removal of some of the planned interchanges along US Route 29 (projects now on hold) from the Comprehensive Transportation Program. The Musgrove interchange, in particular, is in direct conflict with the Fairland Master Plan.

7. Request a commitment for more certain dedicated funding to Montgomery County for transit (like the VDOT I-66 Transform project) as part of MDOT SHA’s Managed Lanes project/Traffic Relief Plan. This funding commitment is needed to support both construction activities and to improve person throughput once the Managed Lanes are complete and operational.

8. Move State Highways recommendation #5 — MD 97 (Georgia Avenue) and MD 28 (Norbeck Road) Interchange to the bottom of the list as recommendation #9.

9. Provide a numerical ranking of all transportation priorities in one table to accompany the draft letter.

Additionally, given the anticipated completion of the Watkins Mill interchange in 2021, Commissioner Patterson suggested placing a higher priority on the State Highways recommendation for improvements to MD 117 (Clopper Road).

Commissioner Cichy suggested adding a recommendation for the addition of a 3rd track on the Brunswick Line to the Commuter Rail Expansion recommendations on page 2 and 3, as well as a short-term option to consider the use of layover track sidings.

We appreciate your consideration of our comments on the County Priorities Letter and look forward to working with you and your staff. If you have any questions about the comments, please call Stephen Aldrich at 301-495-4528, or feel free to call me at 301-495-4605.

Sincerely,

Casey Anderson
Chair

Staff report 2020 County Priorities Letter Review – Planning Board item 2 December 5, 2019
Presentation – 2020 County Priorities Letter Review

cc: Gwen Wright, Director, Montgomery Planning
    Tanya Stern, Deputy Director, Montgomery Planning
    Robert Kronenberg, Deputy Director, Montgomery Planning
June 29, 2017

Peter K. Rahn  
Secretary, Maryland Department of Transportation  
7201 Corporate Drive, P.O. Box 548  
Hanover, MD 21076

Montgomery County is a diverse community with many transportation needs. As always, we appreciate our cooperative relationship with the State of Maryland so that, together, we can meet the needs of our residents and businesses. We would like to thank MDOT for advancing important projects in our county, most notably the Purple Line, the Brookeville Bypass, the I-270 Innovative Congestion Management project, and the full scope of Watkins Mill Interchange.

With respect to the Purple Line, we appreciate your efforts to resolve the litigation that has delayed the project. We commend your commitment to the project and stand ready to support your efforts to secure federal funding and to move the project forward.

We are also appreciative of MDOT’s support to WMATA as Metro works to restore its organizational health, operational safety, and customer service. We hope that, with your continued support, WMATA will restore public confidence and return to being a point of pride for the region.

MDOT has also been a critical partner, working with Montgomery County, to improve our pedestrian and bicycle networks. We appreciate your recent grants supporting our Bikeshare network, and your staff’s commitment to participating in our Pedestrian Bicycle and Traffic Safety Advisory Committee (PBTSAC).

As we look to the future needs of Maryland residents in Montgomery County, we have updated our priorities for state investment in transportation infrastructure. For the FY2018-2023 Consolidated Transportation Program (CTP), we have organized our priorities by emphasis area to aid in programming of future state resources toward the transportation needs in Montgomery County. The type of support requested is identified in parentheses after the project name.
Interstate Program

The major Interstates in Montgomery County are subject to long-span, recurring congestion and need significant facility renewal and expansion. Our top priorities for these facilities include:

1. **I-270 Corridor/I-495 West Side Improvements:** (Planning) I-270 needs substantial investment to improve its performance. Investment in the Watkins Mill Interchange and the Innovative Congestion Management (ICM) projects represents a major commitment by the state; however more is needed. We request that MDOT complete the I-270/U.S. 15 Multimodal Corridor Study including advancement of the county-recommended reversible high-occupancy/toll lanes between Shady Grove Road and Frederick County, as well as a grade-separated interchange at I-270 and Little Seneca Parkway Extended. Additionally, we request that the state advance the study of capacity and operational strategies from I-270 and along I-495 into Virginia that address freeway performance along with transit, pedestrian, and bicycle connections over the Potomac River, including advancement of the county recommended high-occupancy/toll lanes between the I-270 West Spur and Virginia. The preferred outcome of these studies is a set of complementary short, medium, and long-term measures that provide for reliable travel on these critical corridors.

2. **I-495 (Capital Beltway)/I-270 East Spur Improvements:** (Planning) Similarly, Montgomery County requests that the state explore congestion management strategies for the Capital Beltway from I-270 to I-95 and to evaluate whether bottlenecks can be improved either through innovative strategies like ramp metering and peak-period shoulder use, or through other spot improvements that are respectful of our natural resources and communities.

Other State Highways

The following projects represent our highest priorities for improvements to state highways:

1. **U.S. 29 (Columbia Pike) Shoulder Repairs, Transit Reliability, and Congestion Management:** (System Preservation and Planning) Montgomery County is investing to implement BRT service on U.S. 29 in 2020. We request that the state repair the shoulders on U.S. 29 to improve the driving surface for transit vehicles. We also request state participation in evaluation of strategies to manage congestion and improve transit travel time reliability between Tech Road and Silver Spring. These improvements will complement programmed investment in transit stations and vehicles for Maryland’s first BRT service and should improve non-auto driver mode-share on this corridor.

2. **MD 355 (Frederick Road) Improvements from MD 27 to Stringtown Road:** (Planning) The rapidly-developing Clarksburg area of the county is served by limited and congested transportation links. Expanding MD 355 and addressing intersection needs at Brink Road, West Old Baltimore Road, Little Seneca Parkway, Shawnee Boulevard and other intersections between MD 27 and Stringtown Road, consistent with the Clarksburg Master Plan, may be the most cost-effective and least impactful way of improving access to and from this community. In addition to capacity, the improvements need to address pedestrian and bicycle connectivity, access to schools, and transit needs.
3. **U.S. 29 Safety and Capacity Enhancements:** (Planning, Design and Construction) Traffic operations at several locations on U.S. 29 between Stewart Lane and MD 198 in Montgomery County result in recurring congestion and safety concerns. Interchanges have been identified as solutions at a few of these locations, including Fairland/Musgrove Road and Tech Road/Industrial Parkway, but funding for design and construction has not been identified in the current CTP. Additionally, the proposed designs have not achieved community support. We request a more comprehensive assessment of the signalized intersections on the U.S. 29 corridor, taking into consideration community preferences, approved land use plans, BRT operations, pedestrian and bicycle needs, traffic safety and throughput. We expect that advancing concepts to a common level of design and defining a prioritized implementation program for the short and long term that addresses the interactions between the locations will be the best way to address the needs of this corridor while avoiding unintended consequences to our communities and businesses.

4. **MD 97 (Georgia Avenue) Safety and Complete Streets Improvements/Metro Station Pedestrian Access Improvements:** (Design) Georgia Avenue, between the Beltway and 16th Street, carries some of the highest volumes of any arterial in the county. Using county funds, the State Highway Administration is nearly complete with an alternatives assessment and NEPA documentation for improvements that address safety, operational, and access challenges, while also improving bus stops, and providing a dedicated cycle route. The county also conducted a facility planning study for a grade-separated pedestrian connection across Georgia Avenue so that existing residential areas and the Holy Cross Hospital can access the Forest Glen Metro station more safely. We request that MDOT include the pedestrian crossing in its preferred alternative and advance the combined project into design. When completed, this project will improve a major gateway into the Silver Spring Central Business District and improve safety and accessibility within the Montgomery Hills and Forest Glen communities.

5. **MD 28/198 Improvements (Norbeck Road and Spencerville Road):** (Design and Construction) The state recently completed an alternatives analysis for the 11-mile MD 28/198 corridor between MD 97 (Georgia Avenue) and I-95 in Prince George’s County. Montgomery County requests that the state advance elements of this corridor into design and construction.

   **Burtonsville:** Concepts for improvements between Old Columbia Pike and U.S. 29 through the Burtonsville business district have been identified. The county requests that the state select and refine a design concept for this portion of the corridor that is supportive of the *Burtonsville Crossroads Neighborhood Plan (2012)* goals of fostering a sense of arrival and providing a multimodal, attractive Main Street character for this community while improving pedestrian and bicycle infrastructure and roadway operations. Additionally, pedestrian, traffic safety, and intersection improvements are needed between Old Columbia Pike and New Hampshire Avenue.

   **MD 97 to MD 200:** At the west end of the corridor, we request that the state accelerate its ongoing efforts to improve pedestrian and bicycle facilities along and across MD 28 between MD 97/Georgia Avenue and Wintergate Drive.
6. **MD 97/Georgia Avenue and MD 28/Norbeck Road Interchange:** (Design) The intersection of MD 97 and MD 28 is constrained and congested, particularly due to the proximity of the MD 200 Interchange just to the north and the intersection of MD 28 and MD 115 just to the west. Improvement to this location is important for facilitating access between Olney and Silver Spring and for the connection from Rockville to MD 200. We request that the state reinitiate design of an interchange at this location.

**Washington Metropolitan Area Transit Authority (WMATA)**
The transit services provided by WMATA are essential to Montgomery County and require additional state support and investment.

1. **Metrorail and Metrobus:** (WMATA Funding) High quality and reliable Metrorail and Metrobus services are critical to easing traffic congestion as well as enhancing quality of life, reducing carbon emissions, and supporting Montgomery County's economic future. Less service and higher fares are counterproductive to attracting riders at a time of extended degraded service quality. We request the state to expand its support for Metro, including dedicated funding, in order to address the long-term degradation to the system that has occurred over many years and to provide the resources necessary to restore the system to world-class status without further burdening riders. Funding should be sufficient to allow rollback of the service cuts of June 2017 as soon as is feasible.

2. **Metrobus Priority Corridor Network (PCN) Improvements:** (Construction) Montgomery County seeks state support for Metrobus service improvements and implementation of roadway improvements such as queue jumps, transit signal priority, and other measures to improve travel times and reliability on high priority transit corridors within the county.

**Bus Rapid Transit (BRT)**
Transit is a key element of the county's Master Plan. BRT on U.S. 29 - the first of its kind in Maryland - is advancing as a county-funded project and our priorities for state investment in BRT include:

1. **Corridor Cities Transitway (CCT):** (Design & Construction) The Corridor Cities Transitway is a foundational element of the Great Seneca Life Sciences Corridor. We appreciate the state's commitment to complete the preliminary design (30% design) and NEPA phase of the project and ask that the state identify a capital contribution sufficient to support an FTA New Starts and/or P3 implementation.

2. **MD 355 Bus Rapid Transit:** (Design) This project will accelerate development in the White Flint, Rockville, Gaithersburg and Germantown portions of the county. BRT on MD 355, which has the highest projected ridership among the BRT corridors in the county's plan, will also provide a much-needed public transit service to the rapidly-developing Clarksburg area. We request state funding to complete preliminary design for this corridor, building upon to the county's planning process currently underway.
3. **MD 586/Veirs Mill Road Transit Enhancements**: (Design, Grants). The state recently completed the planning study for BRT on Veirs Mill Road. The study found that substantial benefits for transit and general traffic can be realized through implementation of BRT elements and queue jump lanes. We request that the state advance these improvements into design. In the short-term, we also request that MDOT provide funding for WMATA to implement the Q9 MetroExtra service on MD 586 between Wheaton and Rockville.

4. **MD 650/New Hampshire Avenue BRT Planning and Service Improvement**: (Planning, Grants). BRT on New Hampshire Avenue is called for in the Countywide Transit Corridors Functional Master Plan (CTCFMP) and we request state engagement and planning support for this corridor. Additionally, we request that the state provide funding for the extension of the K-9 MetroExtra service from its current terminus at the Food and Drug Administration (FDA) to White Oak.

**Pedestrian and Bicycle**
Pedestrian and bicycle safety, the implementation of Bikeshare as a permanent component of our transportation system, and creating a safe and attractive walking environment in our key growth areas are critical needs for state support.

1. **Pedestrian/Bicycle Safety Implementation on State Highways**: (Design and Construction) We request that the state increase funding to address sidewalk gaps, crosswalk conditions, trail crossings, and other issues in support of the county’s Pedestrian Safety Initiative and Vision Zero. Our highest-need locations are on state highways, including MD 118 (Germantown Road), MD 586 (Veirs Mill Road), MD 185 (Connecticut Avenue), MD 28 (Norbeck Road), MD 190 (River Road), MD 97 (Georgia Avenue), MD 182 (Layhill Road), MD 650 (New Hampshire Avenue), MD 320 (Piney Branch Road) and MD 355 (Rockville Pike/Wisconsin Avenue/Frederick Road).

2. **Bikeshare Program Support**: (Grants) Federal, state and private grants have been essential for Bikeshare in Montgomery County, a system that has now grown to 70 stations. Bikeshare contributes to achieving non-auto drive mode share (NADMS) goals in focus-areas within the county and provides an excellent complement to local and regional transit systems. Additional state capital and operating support for this system will help secure its long-term future and develop into a network that supports a broader geographic area.

3. **Bicycle and Pedestrian Priority Areas (BiPPAs)**: (Planning, Design and Construction) The county has identified over 30 BiPPA’s and has prioritized five for early actions. To be effective, the county will need state cooperation and financial support to implement improvements to state infrastructure in these priority areas.

4. **Intercounty Connector (ICC) Multiuse Trail**: (Planning). A multiuse trail was constructed concurrent with the ICC for much of its length. We request that the state begin planning for completion of the gaps between Layhill Road and Notley Road and between MD 650/New Hampshire Avenue and Briggs Chaney Road.

**Commuter Rail**
The MARC system operated by MTA is important for moving commuters to Rockville, Silver Spring and Washington, D.C. and the system could provide even greater benefit through enhancements to the service and increasing the system’s accessibility. Priorities for MARC enhancements include:
1. **Boys Station Expansion**: (Design and Construction) Parking at Boys is limited and bus service to the station is challenged. If expanded, this station could provide new opportunity for Clarksburg and other Upcounty residents to access MARC, improving ridership from this station.

2. **Midday and Off-Peak Service**: (Planning and Operating) MARC service provides an option for peak period, peak direction commuting. As travel patterns change and reverse commuting becomes more significant, providing more midday and off-peak trains will increase the value MARC service provides to Montgomery County and will increase the attractiveness of employment in Maryland for the growing population in the District of Columbia.

3. **White Flint Station**: (Planning) The plan for White Flint includes a new MARC station to serve this emerging mixed-use community and we request that MTA advance study of the station.

**Transportation Alternatives Program**

Montgomery County relies on an extensive network of recreational trails through county parks, state lands, and National Parks. In addition to pedestrian and bicycle improvements to the road network in the county, investment in these facilities using Transportation Alternatives Program (TAP) funds can improve off-road facilities and enhance the transportation and recreational functions they provide.

1. **C&O Canal National Historic Park Improvements**: (Grants) We request state support for the National Park Service’s proposed restoration of deteriorated portions of the C&O Canal Towpath and re-watering of C&O Canal sections to improve the quality of this vital recreational and historic transportation resource.

2. **Montgomery County Off-Road Trails**: (Grants) Montgomery County enjoys an extensive trail network through the county and local parks. Many of these trails provide alternative connections between communities and run parallel to major state highways. State support for improvements to these trails will help them remain a vital component of our network.

3. **C&O Canal Byway**. (Planning) The C&O Canal is a significant draw for visitors in Washington, Frederick, and Montgomery Counties. A Byway Management Plan would help identify important resources and attractions on this corridor, define management strategies for the routes and resources that make up the Byway, and define federal, state and local priorities for management, maintenance, and investment in these resources to deliver a high-quality visitor experience and provide economic benefits to the state and communities along the route.

We thank you again for your continued partnership in meeting the needs of Maryland residents and businesses in Montgomery County. If you have questions about our priorities, please contact us.

Sincerely,

Isiah Leggett  
County Executive

Roger Berninger  
County Council President

Process for CTP Development

The CTP takes nearly a full year to create through the collaboration and work of MDOT staff with state, regional and local elected officials. Each year, local jurisdictions are encouraged to submit priority project(s) to the State by April. It is important for MDOT to hear from local jurisdictions to facilitate collaboration on state and local needs. MDOT uses the following criteria to identify projects and programs that respond to the State's transportation priorities.

These criteria include:

- Meets all federal and other legal mandates (e.g. Total Maximum Daily Load (TMDL) compliance, Positive Train Control (PTC), Federal Aviation Administration (FAA) regulations to maintain airport permits);
- Supports MDOT's program priorities and MTP goals (safety, system preservation, economic development, etc.);
- Meets all federal match requirements to maximize federal revenue sources;
- Supports state plans and objectives;
- Supports existing project commitments and upholds intergovernmental agreements;
- Is the single top priority within a local priority letter;
- Is consistent with local plans; and
- Is included in the regional Metropolitan Planning Organization (MPO) long-range plan (if the project is located within an MPO boundary).
MEMORANDUM

November 18, 2019

TO: Melanie Wenger, Director
   Montgomery County Office of Intergovernmental Relations (OIR)

FROM: Christopher R. Conklin, Director
   Montgomery County Department of Transportation (MCDOT)

SUBJECT: 2020 Montgomery County Transportation Priorities Letter to the Maryland Department of Transportation (MDOT)

On a periodic basis, Montgomery County expresses its priorities for State investment in transportation facilities and services. Montgomery County last prepared such a letter in 2017. Since that time, there have been many changes to the State transportation program and in Montgomery County’s areas of emphasis.

MDOT is expecting to receive this letter by April 2020. MCDOT requests that OIR solicit comments from the State Delegation and provide feedback to MCDOT by Friday, December 20, 2019.

Please feel free to contact me if you have any questions at 240-777-7198 or christopher.conklin@montgomerycountymd.gov and thank you in advance for your assistance.
