

# **MONTGOMERY COUNTY CLIMATE INITIATIVES**

BRIEFING FOR TRANSPORTATION & ENVIRONMENT COMMITTEE

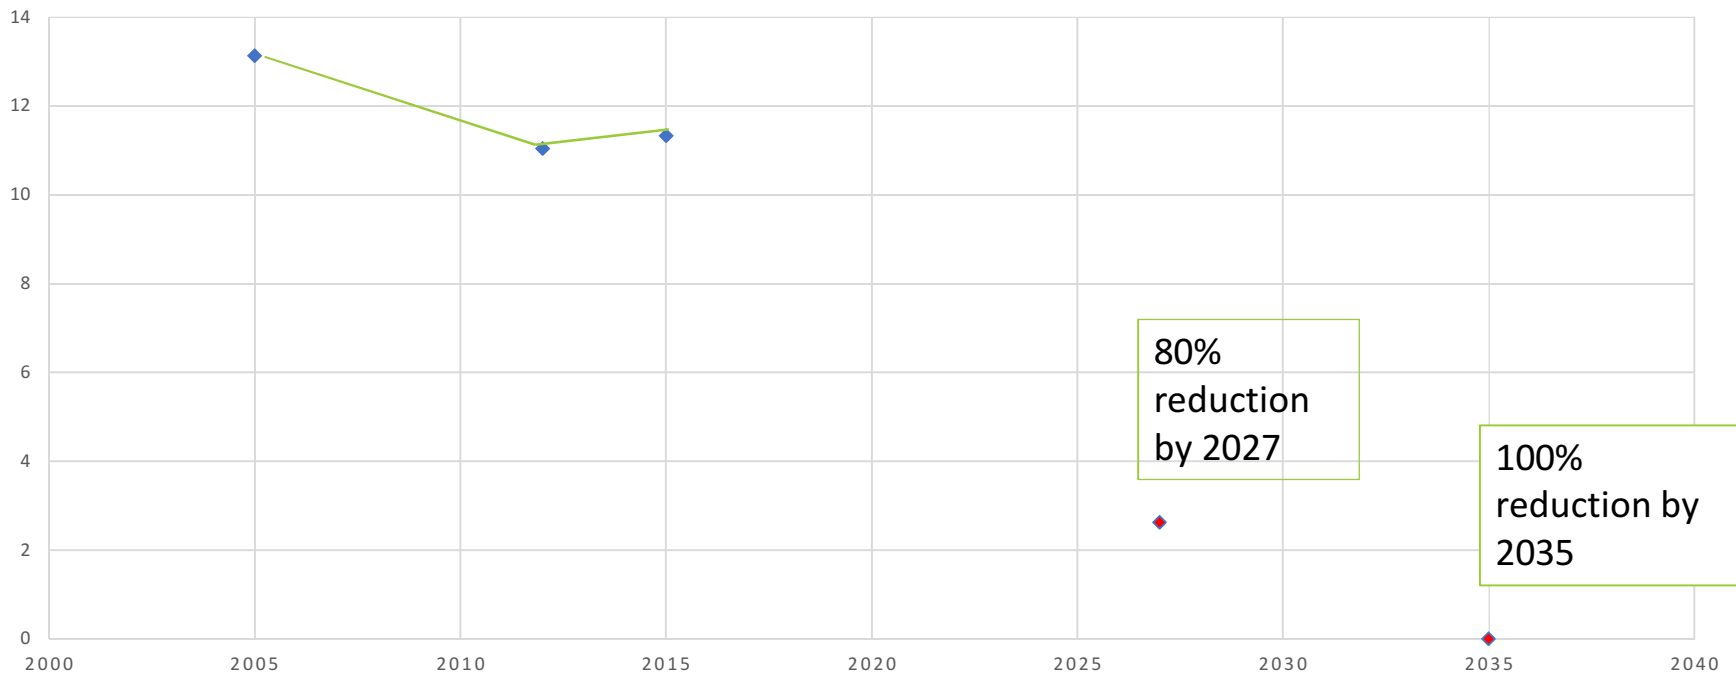

APRIL 5, 2019

# Agenda

---

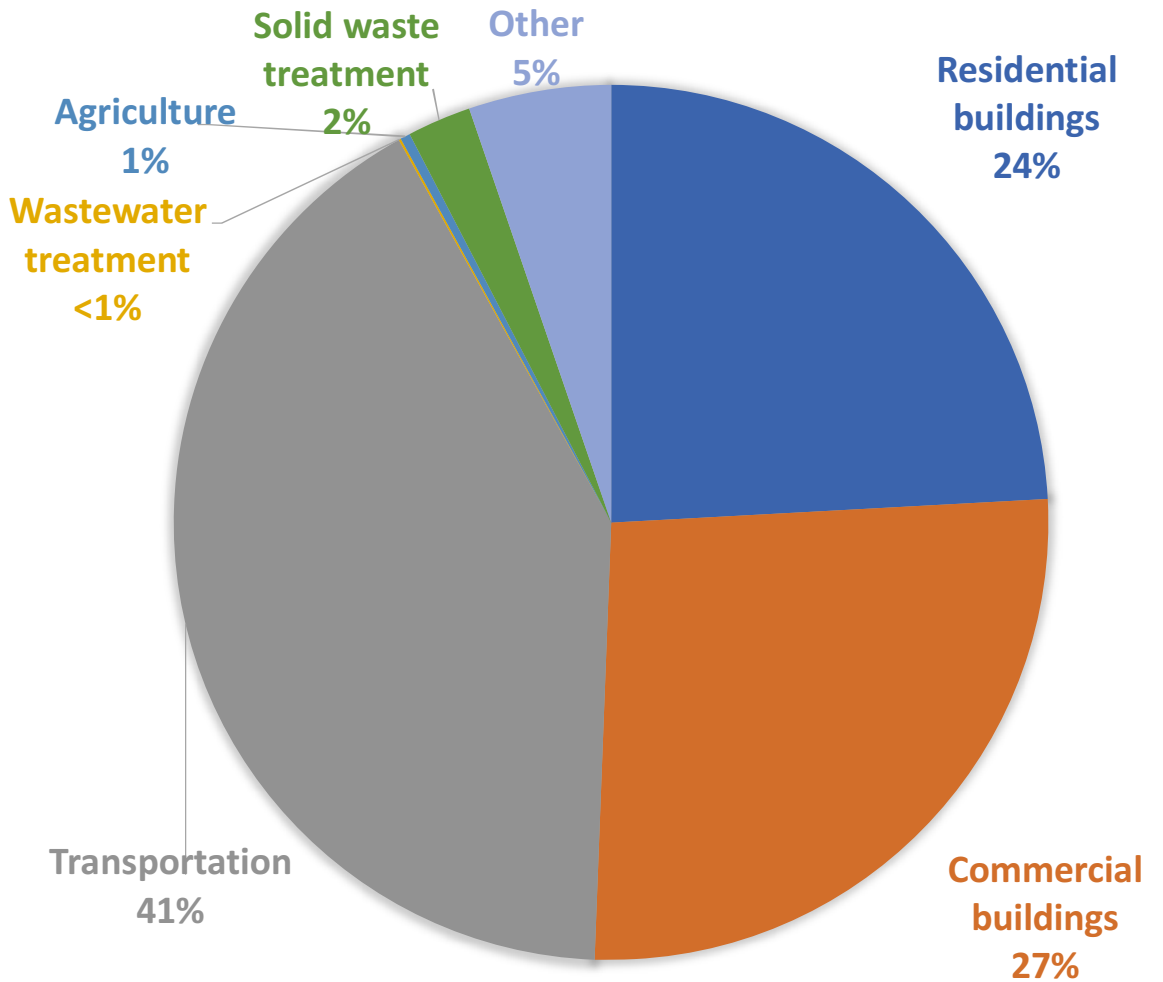

1. Greenhouse Gas Inventory data
2. Current actions & opportunities for buildings, energy supply, and transportation
3. Climate planning and coordination
4. Micro-actions each of us can take

# Montgomery County Greenhouse Gas Emissions Trends (million metric tons of CO<sub>2</sub>e)

Source: Metropolitan Washington Council of Governments (MWCOC) Montgomery County GHG Inventory

# Montgomery County Greenhouse Gas Emissions Profile (2015)

**2015 total emissions: 11.34 million metric tons of CO<sub>2</sub>e**

Source: MWCOG Montgomery County GHG Inventory

**80%  
Emissions  
Reduction  
Goal  
by 2027**

**2027 Emissions goal: 2.6 million metric tons of CO<sub>2</sub>e**

**100%**  
**Emissions**  
**Reduction**  
**Goal**  
**by 2035**

**2035 Emissions goal: 0 metric tons of CO<sub>2</sub>e**

# Residential buildings

24% of emissions

# OF HOUSING UNITS:  
**356,603**

Source: MWCOG Montgomery County GHG Inventory

# Residential Building Initiatives

---

## *Implemented / In process:*

- Energy efficiency/weatherization services to low-income households
- Energy efficiency incentives for limited-income multifamily communities
- Energy Coach
- Green Bank financing for energy efficiency improvements

## *Opportunities for:*

- Pursuing greater energy efficiency through building codes and incentives for weatherization

# Commercial buildings

27% of emissions

TOTAL # OF COMMERCIAL BUILDINGS:

**4,570**

**891** COMMERCIAL BUILDINGS BENCHMARKED

TOTAL COMMERCIAL SPACE:

**151.7 MILLION** SQUARE FEET

**94.7 MILLION** SQUARE FEET BENCHMARKED

Sources: total # of buildings and SF: MWCOG Montgomery County GHG Inventory; benchmarking #'s: DEP, CY2017.

# Commercial Building Initiatives

---

## *Implemented / In-process:*

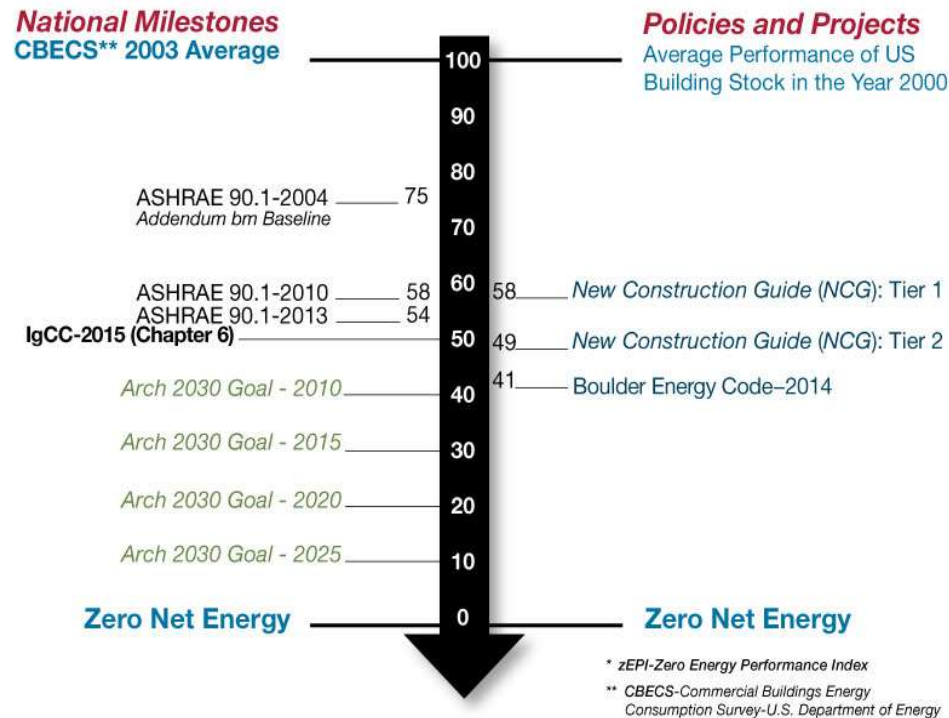

- Green building codes
- Energy benchmarking
- C-PACE financing
- Green Bank financial products
- Revisions to the County's current green building tax credit, which is based on LEED certification. Stakeholder work group recommendations under review by the County Executive and DEP.

## *Opportunities for:*

- Developing a strategy for achieving improved energy efficiency in new and existing buildings, including by continuing to adopt aggressive building energy codes
- The County Executive supports expanding the commercial benchmarking law to include smaller buildings and multifamily properties.

# Montgomery County's Adopted Zero Net Energy Performance Index (zEPI) is 50

## zEPI\* Scale to ZNE

# International Green Construction Code

## Effective 12/1/2017

---

- New construction and additions 5000 square feet and above
- Does not apply to single family or to renovations/alterations
- Construction and Demolition waste diverted from landfills – minimum of 50%
- Enhanced energy performance of 50% better than 2012 IECC
- Heat Island Mitigation – minimum of 40%
- Project electives – enhanced stormwater, water reclamation, daylighting, vegetation, acoustics, etc.
  - GFA less than 10,000 square feet – 2 project electives
  - GFA 10,000 – 20,000 square feet – 3 project electives
  - GFA over 20,000 square feet – 4 project electives
- LEED Silver may be offered in satisfaction of project electives

# County Facilities & Lighting Initiatives

---

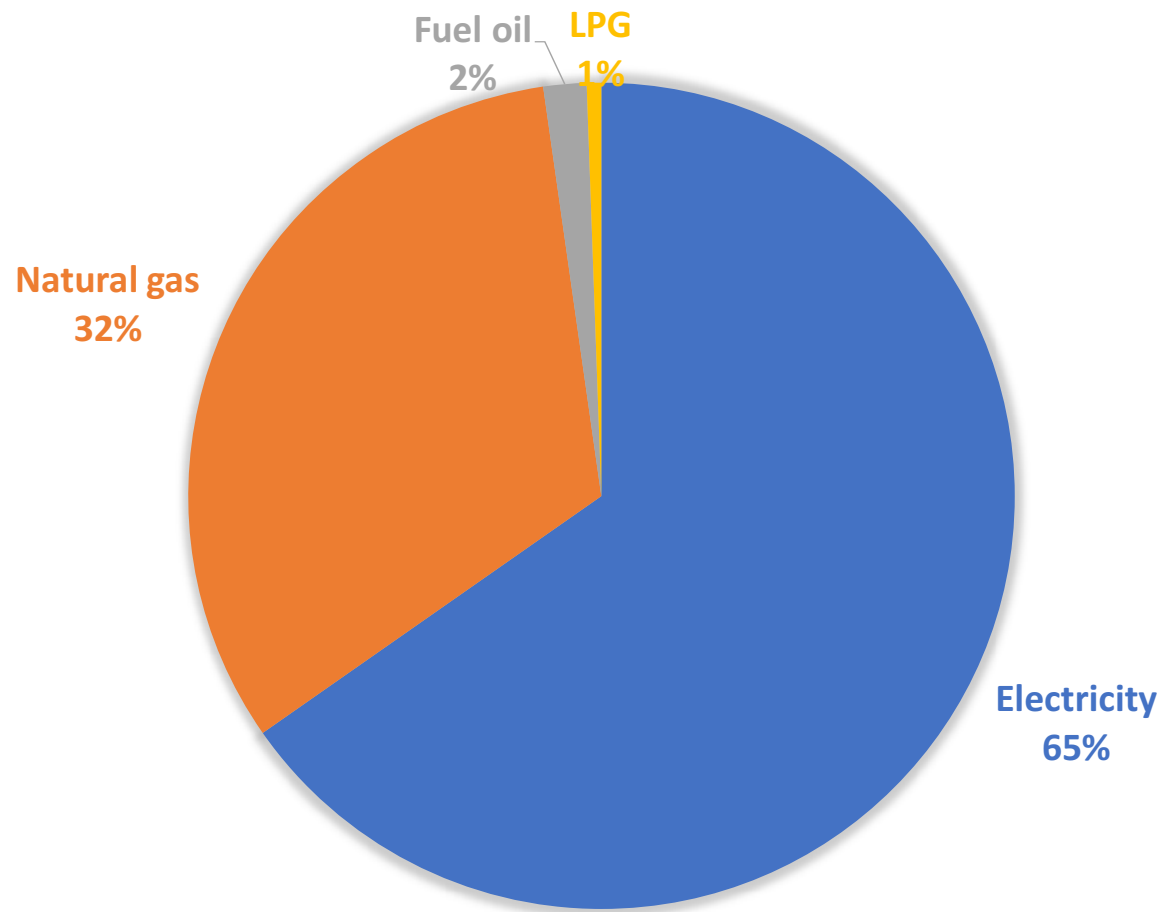

## *Implemented / In process:*

- 56 energy projects since 2014
- 13 LEED Gold and 7 LEED Silver buildings as of 2018 + Wheaton Office Building will be LEED Platinum
- 51 new energy projects planned for FY19 through FY21
- New Energy Performance Contracting vehicle to be issued in FY19
- “Work Green” engagement pilot to encourage sustainable behaviors by facility occupants and employees, expandable to County and agencies
- Replaced all county-owned traffic signals with LED signals
- Upgraded 4,900 lighting fixtures in County parking garages to LED
- Retrofitting 26,000 County-owned streetlights with LED lights

## *Opportunities for:*

- Pursuing LED streetlights for utility-owned streetlights

# Building Sector's Sources of GHG Emissions

Source: MWCOG Montgomery County GHG Inventory

# Distributed and Renewable Energy Initiatives for the Private Sector

---

## *Implemented / In process:*

- Expedited rooftop solar permitting and reduced permit fees for residential rooftop solar
- Permitting solar fields as accessory uses and zoning text amendments that reduce setbacks for solar
- Advocating for state legislation that supports long-term expansion of community solar.

## *Opportunities for:*

- Convening work group to ensure County's laws and policies encourage, and do not provide barriers to, the implementation of solar PV, including community solar and battery storage, and geexchange systems

# Distributed and Renewable Energy Initiatives for County Facilities

---

## *Implemented / In process:*

- Microgrids at Public Safety Headquarters and County Correctional Facility
- 17 solar projects totaling 7.6 MW
- Purchased 100% wind energy and additional clean energy RECs to offset fuel and energy consumption
- Installed solar powered on-street parking meters in all county parking lots
- Installed solar powered lights at 42 Ride-On bus shelters
- Installing solar powered school and pedestrian flashers
- Surveyed all County-owned sites and identified possible solar sites, including surface parking lots, building roofs and solar pole lights

## *Opportunities for:*

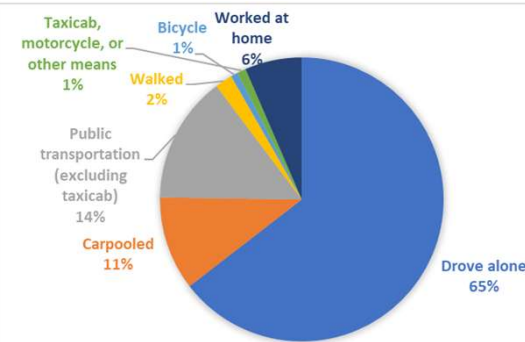

- Planning Oaks Landfill solar project; future potential for Gude Landfill
- Exploring more opportunities for microgrids in County facilities or under Public-Private initiatives
- Exploring installation of solar panels on county parking facilities
- County Government criteria and standards for net zero and resilient facilities

# Transportation

41% of emissions

## HOW WE TRAVEL TO WORK:

HYBRIDS, EVs, & PLUG-IN HYBRID ELECTRIC CARS:

3% OF ALL VEHICLES

# OF VEHICLES REGISTERED:  
**800,392**

# OF COUNTY FLEET VEHICLES: **3,342**

Sources (clockwise f/ top right): MD Motor Vehicle Administration 2017 annual report; DGS FY2017 annual report; DEP 2017 Office of Sustainability Annual Report; US Census Bureau American Community Survey 2017 Table S0801.

# Transportation Initiatives

---

## *Implemented / In process:*

- Ride On, Ride On ExtRa, Kids Ride Free, Seniors Ride Free
- FLASH bus service on Route 29 starting in 2020.
- Ride On Flex microtransit pilot
- Bus Rapid Transit Planning for: MD 355, New Hampshire Avenue, North Bethesda Transitway, Corridor Cities Transitway
- Implementing the Bicycle Master Plan through new bicycle infrastructure, including separated bike lanes.
- Building new sidewalks and ADA ramps
- Bike/Pedestrian Safety Initiative, Vision Zero and Safe Routes to Schools Green Street and low-impact design principles implemented into transportation projects

## *Opportunities for:*

- Implementation of NextGen Transit Demand Management legislation
- Encouraging employers to expand telework options

# Electric Vehicle Initiatives for the Private Sector

---

## *Implemented / In process:*

- Installed 32 electric vehicle charging stations in County garages
- Expedited permitting process for electric vehicle charging stations
- Reduced fees for residential EV permits
- New program for utility incentives/rebates for private charging stations and utility owned/operated chargers in public spaces.

## *Opportunities for:*

- Convening a multi-department team, with community and industry stakeholders, to develop a comprehensive strategy for expansion of EV use and implementation of charging infrastructure (e.g., charging in the ROW) and has already been in conversations with Pepco about this.
- Developing EV and charging infrastructure buying co-ops or other programs to expand the use of electric vehicles.

# Electric Vehicle Initiatives for County Government Fleet

---

## *Implemented / In process:*

- Purchased 39 battery electric and 193 hybrid fleet vehicles
- Purchasing the County's first 14 zero-emissions electric buses and charging stations

## *Opportunities for:*

- Improved infrastructure at County Depots to support growth in EV bus fleet
- Reducing the County fleet via right-sizing, expanded motor pooling, and virtual meeting options
- Expanding electric vehicles and charging infrastructure for County fleet and employee use

# Climate Planning & Coordination

---

- Climate leadership meetings of county departments
- Plans for more public engagement—including climate advisory opportunities
- Build on previous climate planning efforts– need a roadmap of prioritized actions.
- Identifying resources to prioritize planning and implementation efforts.
- Climate website under development

# Micro-Actions You Can Take

---

- Live car-free if you can
- Buy green energy for your home
- Make your home more energy efficient
- Walk and bike more, drive less, and use more public transportation
- Eat more plants and less meat
- Replace gas-powered car with electric vehicle

... and encourage your friends and family to do the same!
