

There are several concerning things about this hearing, specifically about limiting daycare capacity to 50%.

Voting on this measure on Thursday, and implementing it so shortly after, both parents and daycares are blindsided if this were to pass. Other measures in this bill do not require stable situations to break so quickly

Why is daycare specifically targeted with this measure – has daycare been shown to increase community spread? It would seem limiting bars, restaurants, churches, and other community gatherings would do more to stop the spread of Covid. Mask mandates should be enforced.

This feels like an approach to hit daycares and parents, and leave other businesses open.
