

To Whom It May Concern:

I am a bowler and I don't understand how a building as large as a bowling CENTER (not alley) would only be allowed to operate with 25 people and stay in business. There is plenty of room to social distance. Most league bowlers have there own equipment so there is no contact transmission from bowling equipment. And last, how many employees are you going to lose there jobs that finally have gone back to work.

Thank you,
Michael Gottlieb
