

SRO support

My name is Rosa Santos and work closely with SROs in the schools I

support. Their collaboration with staff and students has been positive from my experience. They are trained to provide the service to be a support to all students and staff interacting with them. They have participated during students' meetings to explain laws that need understanding. Every time I have had an interaction or requested their support, they are always available. One of them greets students every morning with encouraging and sometimes funny posters. Losing their support will be detrimental to the school climate. That is way I support that SROs stay in the schools.
