

To Montgomery County Council:

Recall that the Council previously agreed that if 50% of Montgomery County residents have received all required doses of a COVID-19 vaccine, Montgomery County was to fall in line with the State of Maryland's guidance. With nearly 65% of Montgomery County residents fully vaccinated, I do not agree that our county now requires COVID-19 guidance that differs from the State of Maryland. Please continue to align the county's guidance with the State of Maryland.

Thank you,

Michael Patrick
