To the Montgomery County Council:

RE: Resolution to adopt a Board of Health Regulation to prevent the spread of COVID-19 in the County

I have heard that you may consider creating more mask mandates and restrictions because of the new delta variant that has been spreading. While even vaccinated people can catch this variant, including the danger of the variant being more contagious, I have heard that the delta variant is FAR LESS DEADLY than the original coronavirus. I do not want there to be more restrictions in this county. We have to move on, and if we want to get back to normal, we can do that ONLY IF YOU DO NOT impose any more mask mandates. I repeat, things have to get back to normal. I know there is more in this beautiful county than restrictions and face masks; all of us need Montgomery County up and running again.

Thank you very much,
Michael Ryan
