 Back

Dear County Council,

In a county that is already strained and divided, we do NOT need to segregate and vilify a segment of the population. ANY time in history a segment of society has been segregated against it has not turned out well for that society. Vaccine passports will be horrible for Montgomery County.

The vaccine has been shown to help the vaccinated individual have less instances of severe disease. The vaccine has been shown to NOT stop infection and transmission. So there is no reason to segregate vaccinated individuals from unvaccinated individuals.

This will put an undue pressure and strain on businesses that have already been hurt by this pandemic.

Please unify our County and do not divide us any further.

Thank you,  
Andrew
