

To All county council members and to the county executive...

As a member of this community somebody that grew up here went to school here and have learned a lot over the years about government overreach what you are about to do by potentially passing this vaccine passport is exactly that.

It is really this simple asking people to supply their "Papers" for the right to be able to eat in a restaurant work out in a gym go to a movie with a family is absolutely ludicrous. Multiple members of your board are very aware of multiple people at this point that have been vaccinated wear masks heck even where kn95 masks and still end up getting covid. Now all you're going to do is segregate people. What are we going back to the point of if you're white you can eat here and if you're black you can eat here it's almost the exact same thing except now if you've gotten your shot you can eat here if you haven't gotten your shot you can't eat here? You were setting a precedent just like some other regions in this country that are very dangerous and that go very much against our Constitution of the United States.

This at the end of the day is going to solve nothing with the exception of potentially having businesses go out of business due to lack of customers or due to lack of people who have the shot and feel that it is inappropriate for government to ask for our "Papers" to be able to spend money at their business.

I will conclude with I realize this is falling on deaf ears you all believe you're doing what is right sadly you were doing the exact opposite you may not believe it but that is what you're doing you should be ashamed of yourselves for segregating a society.
