

Sirs.

I'm a long time county resident and tax payer who is dissatisfied with the onerous restrictions imposed on students and residents of the county.

My child is grown, but my neighbors are struggling with lock-outs of ten days or more and constant testing. While often contradictory, the government guidance is five days to resume normal activities. Given the small impact children, I urge you to eliminate restrictions on healthy (symptom free) students participating in routine school activities and allow parents to make medical decisions for their children as they see fit.

I also implore you to abandon the idea of a vaccine passport and eliminate the restrictions on citizens of the county. I assure you that we will not present such a passport and will travel to adjoining counties for services if adopted in MoCo.
