

I object to this bill because of the following reasons:

1. It will cause more businesses to close.
2. It will cause more people with anxiety, depression and psychological illness and increase public burden on medical and police expenses.
3. It does not help remove virus from county space and border.
4. there is no one size fitting all solution. There are many ways to fight viruses including medicine, natural immunity, natural treatment, etc.
5. Two years's data show that death toll in 2021 is more than in 2020, despite vaccines toll out in 2021.
6. It is time to end pandemic, not locking more people up.
7. School must be open normally and masking should be a choice, not a must have.
8. All public facilities need to be open normally without vaccine and masks mandate to reduce mental illness.
