

I AM NOT IN FAVOR OF A REQUIREMENT OF A VACCINE PASSPORT.

We live in the United States of America. This is a FREE Country wherein people died to give every American this privilege. A vaccine passport, in my opinion, is a violation of rights.

Everyone on this planet has heard of COVID, if people want to take themselves out to shop/eat/etc. every person knows the risk. When people decide to take themselves out, they are accepting the risk.

Maybe have the media start promoting immune education to everyone. It is helpful for a lot of illness: Flu, the common cold, and of course COVID. And most important: to STAY home when you feel not well – common sense.

COVID is a 98% curable virus IF treated. Have the media start sharing the importance of getting the treatments ASAP instead of the “quarantine yourself and don’t take ANYTHING, and if you start to feel like you cant breath, then take yourself to the hospital because now the virus has taken over”. Treating ASAP would keep tons of people out of ever needing hospital care.

People with underlying issues would need to take precaution just like they have always needed to take precaution with regards to the common cold, FLU. Nothing has changed for these people. And if you have underlying issues, these people are not going out socializing anyway; or if they do – that is their CHOICE. They are accepting the consequences.
