

## Expanding Opportunities in Youth Sports – Supported by Montgomery County Tennis Association

Montgomery County Tennis Association provides tennis opportunities for juniors and adults throughout the county. Our organization partners with various facilities to help fill their courts and grow their programs. Our youth programs offer a team component where more than 400 junior players participate throughout the year and across the county. We run up to 8 junior tournaments per year with more than 800 youth participating in those events throughout the year. We feel that tennis is a strong pathway for our youth to grow as individuals by developing problem solving skills as well as self-confidence. Tennis is a lifelong sport that our youth can learn now and continue to play throughout their adulthood no matter what level they are. Our organization supports the growth of tennis and the wellness of our community and that is why we support the expansion of youth sports in Montgomery County. We look forward to supporting the Montgomery County Sports Commission and their pathway to a better future for our youth.
