

Dear Montgomery County Council,

The measures that are in the STEP ACT are long overdue.

Police need to stop wasting time, and using citizen's resources to fund institutionalized racial profiling.

You cannot build trust with the people if you continue to participate in such dangerous, counter-productive activities. You expect Black and Brown people to trust the police, but the police are killing us.

Law enforcement needs to spend time connecting with the community and showing respect, and then maybe you will get more assistance when you are working to prevent and solve crime!

If you all are basically criminals in suits, why do you expect us to help you?

Council members please assist Montgomery County law enforcement to purge the "rotten apples" from among them. The STEP ACT is one way to help us move forward in that direction.

Respectfully,

-Eniola O.
