

Please do not decrease funding for our Parks. Montgomery County has a reputation for having wonderful greenspaces, gardens, trails, swimming pools, waterways and Parks that serve all citizens. Our Parks have modifications to make the areas especially accessible to folks who have disabilities. It is clear that our Parks are well-planned, well-managed and well-maintained to make the best use of all resources. We REALLY need our Parks for relaxation and recreation to help our population maintain good physical and mental health during these challenging times.
