

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

March 3, 2026

Aleenia Nakamura
Gaithersburg, Maryland

The affordability crisis is directly tied to data center capacity, our electric bills are already too high and the People's Counsel has said the proliferation of data centers is to blame. What is the rush to jump in and allow large scale data centers here? There is every reason to wait, particularly with a project with unknown impacts speeding toward approval with no regulations. Slow down - get this right or completely oppose the data center from being built. The lack of transparency from the industry is by design. We rely on our leaders to not accept NDAs and "proprietary information" and get the facts before allowing a new land use here. Please include my comments in the hearing record.

Thank You,

Aleenia Nakamura
