

actions you are allowing by enabling Data Centers to enter our state:

1. ruining our fresh water supply
2. producing at a decibal level that will develop aneurysms in human and animal brains
3. force the locals to foot the electric bill on people we are unable to produce ourselves
4. raise the water temperatures in surrounding fields, forests, and rivers. which is will cause ecological hard in the form of raised water and soil temperatures. which in turn will cause insects and fish to perish. this will cause the species that rely on aforementioned food sources will either die or migrate away from the state for an indefinite amount of time. killing off our hunting and fishing industries both public and private.

Brad Crosen
