Hello:

 I have serious environmental and economical concerns about the use of data centers in Montgomery County. The Feb 3, 2026 Community Forum on Data Center Legislation and Policies, illustrates that a lot of other people do, too.

 Before committing to a decision that could have extensive and damaging repercussions, we need to consider a full cost-benefit analysis, the environmental impact, and have full public disclosure. We need to make a decision that is not only right for our times, but is also right for future generations since they will be shouldering the outcomes. Please put a 6-12 month moratorium on data centers until we can all get this right.

 Thank you for considering this and for your public service.
