

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Carrie Witkop
Chevy Chase, MD

I am concerned that we will support the building of data centers without knowing what the true cost to our community will be. A moratorium until a complete, thoughtful study is done is crucial . It does not seem like the building of data centers will provide long-term jobs and instead will cause environmental problems and increased utility costs. If the county does decide to build them at the bare minimum, they should be paying more taxes for the excessive amount of energy they use and they should be required to supply their own sustainable energy .

Thank You,

Carrie Witkop
