

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

March 3, 2026

David Stern  
Chevy Chase, Maryland

To all:

It is my firm belief that Montgomery County needs to halt data center approval immediately so that we may take the time to study and get resident feedback on any plans going forward. There must be complete transparency and no county acceptance of nondisclosure agreements, no county incentives, no special exemptions from tax, health or environmental requirements, etc. Noise, water use, energy capacity, grid capabilities, consumer power prices, back up generators, current ability of county to provide meaningful oversight at all stages of development and a host of other issues need serious and open study and debate.

I thank you in advance for seeing the necessity of the above and acting accordingly.

DS

Thank You,

David Stern
