

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Denyse Baker
Gaithersburg, MD

I strongly support a moratorium on data centers in Montgomery County until regulations are developed with public input. I would expect any data center to pay for their own power needs and not burden residential rate payers to offset their costs. I am also concerned about water usage by a data center as well as potential noise or other environmental impacts. I support new business opportunities to build our economic base but they must be able to pay for the resources they would need without placing an undue burden on residents. Please hold a public process to determine how best to proceed

Thank You,

Denyse Baker
