

Diane DeFries
Rockville, MD

As a citizen deeply concerned about the environment in the short and long term, I am writing to beg you to consider data centers'™ impact on precious resources (energy, water, air). Without sufficient protections for people as well as flora and fauna, we will become victims of corporations'™ corporations responsible to their shareholders and not to all the Marylanders in Montgomery County you were elected to represent. Until there are clear policies and enforcement mechanisms in place, we need an immediate moratorium on any new data centers in Montgomery County. We should not settle for anything short of a 100% renewable energy requirement as well as strong water, noise and air pollution protection. Stop now. We can't go back and add regulations to the project in Dickerson speeding toward approval.

Thank you.
