

Erika Bucciantini  
Dickerson, MD

While I understand that up here in Dickerson there isn't the same population density as in other parts of the County, I resent that additional heavy industrial facilities are being crammed into the Dickerson facilities without any impact study. The coal power plant was only just shut down. We didn't want that. The incinerator continues to poison our community. We didn't want that, either.

We deserve transparency. We deserve to be treated better than a sacrificial offering to tax dollars when we are going to be shouldering the burdens alone.

Do you know how much pollution the proposed facilities will produce? Do you know how much water they will use? What other infrastructure projects are going to be needed to keep data centers running when the lights go out for everyone else?

Things are far too uncertain on data centers right now. Most residents in MoCo and across the country have turned against data centers. The State is just beginning a study of data centers. The affordability crisis is directly tied to data center capacity. What is the rush to jump in and allow large scale data centers here? There is every reason to wait, particularly with a project with unknown impacts speeding toward approval with no regulations. Slow down - get this right.
