

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

March 3, 2026

Helen Grill
Olney, Maryland

At a minimum there must be a moratorium on data centers in MOCO. At the best, NO DATA CENTERS IN MOCO. Concerns: the use of valuable and large amounts of, and tainting thereof, water needed by humans and farms and animals; the use of large amounts of electricity needed by our current infrastructure and lives; the constant noise impacting mankind and animals that we have no idea how the constant drone affects brains; a "business" that has minimal employment opportunities for MOCO residents; limited long term financial benefits to the residents of MOCO. The State of Maryland has a sufficient number of data centers, I don't see any profit to the residents of MOCO to have any built in our county.

Thank You,

Helen Grill
