I urge you to take this matter seriously, and let the voices of concerned citizens take precedence over development interests.

Less than 6 months ago, most average people didn't know what a data center was. While we are all catching up, more concerning health risks have been linked to data centers, including a GMU study just out this week. The authors urge strong regulations to keep these impacts in check. Montgomery County needs to make sure we have these regulations in place before allowing 5 hyperscale data centers to draw water from the Potomac. Please enact a moratorium as soon as possible and set about a transparent process to understand and regulate data centers here.
