A moratorium on data centers is desperately needed in Montgomery county. There's abundant evidence from residents in other cities where data centers have caused havoc with water, noise and more— not to mention their horrible toll on the environment in general. As a MoCo resident I'm deeply concerned and disappointed that the cluster of data centers in Dickerson got pre-approval without a site plan. A moratorium is the absolute minimum we should be doing to ensure we are protecting and doing what's best for the people, animals, and environment of our county.
